Leadership J-C Couture, Stephen Murgatroyd, 2024-10-21 *Education Futures for School Leadership* is a comprehensive resource to support school leaders as they encounter the growing complexity and uncertainties that characterize life in schools today. Moving beyond conventional change management literature, this book invites current and aspiring school leaders to apply the interdisciplinary tools of futures studies and strategic foresight to their work. Given our shared global challenges, young people deserve schools that are agile, adaptive, and responsive to many possible futures. Driven by the imperatives of equity and inclusion, the authors provide practical evidence, informed strategies, real-world examples, and use cases of futures thinking applied to school staff development and change strategies. Each chapter engages with key educational realities: differentiating instructional planning and assessment, the impacts of artificial intelligence and other technologies, the growing psycho-social issues young people are facing, and more. Informed by years of international collaboration with forward-thinking school leaders and scholars, this book is both a field guide and a call to action for navigating the influence of the future on our present moment and the challenges and promises shaping school life today.

The Politics of Generative Artificial Intelligence in Empowering Education Jian Li, **Humanising Language Education in the Generative Artificial Intelligence Age** Jérémie Bouchard, 2026-01-26 Examining the presence and influence of GenAI in the contexts of English for Academic Purposes (EAP) and written composition within university-level English as a foreign language (EFL) programmes, this book asserts a humanist view of language education informed by critical realism and the social realist philosophy of education. Jérémie Bouchard looks at the GenAI language education interaction through explicit philosophical engagement with the aim of strengthening a critical and emancipatory approach to EAP written composition and language education. By highlighting technological determinism and relating it to broader neoliberalist mechanisms, the book provides new insights into the social, political, economic, cultural, and historical contexts within which the use of GenAI technologies by language teachers and learners can be understood. *Humanising Language Education in the Generative Artificial Intelligence Age* will appeal to students and scholars of linguistics, education, and sociology, as well as organisations devoted to understanding the evolution, application, and impact of GenAI on education and language learning.
