businesses do it More importantly how can you become one of them Oversubscribed is the guide to transforming your business into one which customers fight over Author Daniel Priestley a successful entrepreneur who has built and sold businesses around the world shares proven real world methods that will not only grab customers attention but will also have them lining up to buy from you This invaluable guide will teach you how to drive demand for your products or services far beyond supply and will dramatically increase the success of your business Now in its second edition this updated version offers new insights and motivating examples that are right for the 2020s This book will show you The principles and philosophies Oversubscribed businesses live by that are often the opposite of what most businesses do Specific steps for getting into the mind of your customer so they only want to buy from your business How to structure campaigns and product launches that systematically get your business Oversubscribed How to implement a process of signalling to market and collect signals back from market to build up desire and demand for your products and services The new edition of Oversubscribed How to get people lining up to do business with you is a must read for entrepreneurs marketers business leaders and owners team managers and business students

*The International Responsibility of States for AI-enabled Space Activities* Stefan-Michael Wedenig, 2025-12-22 Artificial Intelligence AI has permeated our every day lives What once was solely a human task has now been taken over by AI May it be credit card approvals customer support financial transactions medical imaging or software development there is AI working behind the scenes Outer space historically always amongst the most developed domains has not remained untouched for long and space applications have started to increasingly rely on AI However this increase in use also leads to a myriad of legal issues particularly the issue of responsibility and liability under Article VI and Article VII of the Outer Space Treaty and the Liability Convention Our legal norms may they be domestic or international in nature are ultimately built around human behaviour and when applied to AI might not function Should damage caused by an AI enabled space object arise it proves difficult to assess the responsibility of the appropriate State party under Article VI of the Outer Space Treaty or the liability of the launching State While legal literature is primarily concerned with domestic legal issues arising from the use of AI an in depth analysis concerning State responsibility and liability for AI enabled space activities is absent Space legal literature strongly favours a view advocating for the creation of new hard law in form of new binding legal instruments or the amendment of existing law Suggestions de lege ferenda are often relied on by authors Given the inherent difficulty in creating new law or amend existing legal instruments this book proposes to look towards the lex lata and argues that the existing legal norms of State responsibility State liability and treaty law are sufficient to govern the responsibility of States for their AI enabled space activities The present research looks at these issues from a public international law perspective and proposes a solution within the lex lata
