Pipeline for Automated Code Generation from Backlog Items (PACGBI) Mahja Sarschar, 2025-01-31 This book investigates the potential and limitations of using Generative AI GenAI in terms of quality and capability in agile web development projects using React For this purpose the Pipeline for Automated Code Generation from Backlog Items PACGBI was implemented and used in a case study to analyse the AI generated code with a mix method approach The findings demonstrated the ability of GenAI to rapidly generate syntactically correct and functional code with

Zero Shot prompting The PACGBI showcases the potential for GenAI to automate the development process especially for tasks with low complexity However this research also identified challenges with code formatting maintainability and user interface implementation attributed to the lack of detailed functional descriptions of the task and the appearance of hallucinations Despite these limitations the book underscores the significant potential of GenAI to accelerate the software development process and highlights the need for a hybrid approach that combines GenAI s strengths with human expertise for complex tasks Further the findings provide valuable insights for practitioners considering GenAI integration into their development processes and set a foundation for future research in this field Proceedings of the 5th International Conference on Internet, Education and Information Technology (IEIT 2025) Hemachandran Kannan,Ouahmiche Ghania,Intakhab Alam Khan,Abdul Samad bin Shibghatullah,2025-09-01 This book is an open access With the development of science and technology information technology and information resources should be actively developed and fully applied in all fields of education and teaching to promote the modernization of education and cultivate talents to meet the needs of society From the technical point of view the basic characteristics of educational informatization are digitalization networking intelligentization and multi media From the perspective of education the basic characteristics of educational information are openness sharing interaction and cooperation With the advantage of the network it can provide students with a large amount of information and knowledge by combining different knowledge and information from various aspects at a high frequency Therefore we have intensified efforts to reform the traditional teaching methods and set up a new teaching concept from the interaction between teachers and students in the past to the sharing between students In short it forms a sharing learning mode For all students strive to achieve students learning independence initiative and creativity To sum up we will provide a quick exchange platform between education and information technology so that more scholars in related fields can share and exchange new ideas The 5th International Conference on Internet Education and Information Technology IEIT 2025 will be held on May 16 18 2025 in Hangzhou China The IEIT 2025 is to bring together innovative academics and industrial experts in the field of Internet Education and Information Technology to a common forum The primary goal of the conference is to promote research and developmental activities in Internet Education and Information Technology and another goal is to promote scientific information interchange between researchers developers engineers students and practitioners working all around the world The conference will be held every year to make it an ideal platform for people to share views and experiences in international conferences on Internet Education and Information Technology and related areas *Research and Innovation Forum 2024* Anna Visvizi,Orlando Troisi,Vincenzo Corvello,Mara Grimaldi,2025-07-26 This book features research presented and discussed during the Research Innovation Forum Rii Forum 2024 As such this book offers a unique insight into emerging topics issues and developments pertinent to the fields of technology innovation and education and their social impact Papers included in this book apply inter and multi disciplinary approaches to query such issues as technology

enhanced teaching and learning smart cities information systems cognitive computing and social networking What brings these threads of the discussion together is the question of how advances in computer science which are otherwise largely incomprehensible to researchers from other fields can be effectively translated and capitalized on so as to make them beneficial for society as a whole In this context Rii Forum and Rii Forum proceedings offer an essential venue where diverse stakeholders including academics the think tank sector and decision makers can engage in a meaningful dialogue with a view to improving the applicability of advances in computer science

Digital Intelligent Aeroengine

Quanyong Xu,Jiali Yang,Wenyu Cao,Zhongzhi Hu,Ai He,Kai Liu,2025-11-24 This open access book provides a deep dive into the digitalization and intelligent technologies transforming the field of aircraft engines offering insights into their critical importance and the challenges they aim to address As the aerospace industry faces increasing demands for efficiency sustainability and innovation digital and intelligent technologies have become essential tools in advancing aircraft engine design performance optimization and lifecycle management These technologies are reshaping the way engines are developed and maintained enabling breakthroughs in predictive maintenance real time diagnostics and cross disciplinary collaboration However achieving these advancements comes with significant challenges such as data integration simulation accuracy and the need for seamless coordination among multiple disciplines This book begins by examining the current state of digital engine technologies highlighting their role in improving design efficiency operational safety and cost effectiveness Through a detailed analysis it identifies critical obstacles such as the complexity of integrating heterogeneous data achieving high fidelity simulations and optimizing whole system performance in multi disciplinary contexts Moving beyond diagnostics the text explores innovative approaches like digital twin based simulation modeling which combines physical models with real world data to accurately predict engine behavior It also introduces advanced methods for creating enhanced whole engine system models enabling multi disciplinary collaboration to ensure design reliability and efficiency A significant portion of this book is dedicated to the concept of the digital thread a framework that ensures consistent data integration and automated workflows throughout the engine lifecycle By leveraging digital threads engineers can streamline design iterations reduce uncertainties and improve overall product quality

Web3 Applications Security and New Security Landscape

Ken Huang,Carlo Parisi,Lisa JY Tan,Winston Ma,Zhijun William Zhang,2024-06-04 With the recent debacle surrounding the cryptocurrency exchange FTX and the crypto trading company Alameda Research the importance of grasping the security and regulation of Web3 cryptocurrency and blockchain projects has been magnified To avoid similar economic and security failures in future Web3 projects this book provides an essential guide and a comprehensive and systematic approach to addressing security concerns Written by experts in tech and finance it provides an objective professional and in depth analysis of security and privacy issues associated with Web3 and blockchain projects The book primarily focuses on Web3 applications and ecosystem components such as the stablecoin decentralization exchange DEX decentralized finance DeFi
