AI-POWERED BUSINESS INTELLIGENCE Leveraging Machine Learning for Scalable Analytics, Automated Insights, and Strategic Decision-Making Kishankumar Routhu, Srinivas Rao Maka, Suneel B Boppana, Niharika Katnapally,

Resources in Education, 1997 **Practical Guide to Artificial Intelligence** Anabela Mesquita, Maria João Castro, Isabel Vieira, 2025-09-25 Artificial Intelligence AI is becoming increasingly present in our lives transforming the way we work learn and interact with the world However many people remain unaware of the full potential of this technology and its effective use This book was created precisely to address this gap as it offers an accessible and practical guide to the main areas of application of Artificial Intelligence across different sectors of human activity Purpose of the Book The primary objective of this book is twofold first to introduce AI particularly Generative AI alongside the art of prompt creation enabling readers to maximize the benefits of these tools and second to map and present the most widely used AI applications highlighting their key features and practical applications Beyond that we also seek to raise awareness of AI's potential across different sectors and to encourage reflection on its impact particularly in terms of ethics and responsible use By bringing this information together in a single volume we aim to support a deeper understanding of AI and empower professionals educators and students to explore these technologies in a more informed and productive manner **Social Reflections of**

Human-Computer Interaction in Education, Management, and Economics Sart, Gamze, 2024-07-18 In today's increasingly digital world the interaction between humans and computers has become a fundamental aspect of our daily lives affecting how we learn work and conduct business However as technology continues to evolve the Human Computer Interaction HCI field faces new challenges and opportunities One pressing issue is the need to understand the social implications of HCI in education management and economics This includes how HCI impacts teaching methodologies business practices and economic models and how it can be leveraged to enhance productivity innovation and entrepreneurship Social Reflections of Human Computer Interaction in Education Management and Economics addresses these challenges by comprehensively exploring HCI and its societal implications This book is essential for scholars practitioners and policymakers looking to understand the complex interplay between humans and computers in today's digital age It offers practical insights and theoretical frameworks that can inform the design of more effective educational programs management practices and economic policies **The Video Source Book**, 1992 **PRESENT SENSE** Steve

Morlidge, 2019-10-04 In this provocative yet practical guidebook Steve Morlidge demonstrates why the approach and methods of performance reporting that all information professionals have been taught fails and what we need to do differently to help us make sense of the dynamic complex and data rich world in which we now live and work Reporting on performance should not be treated as worthy but dull requiring no more than routine comparisons of actual against targets This traditional approach is based on the false premise organisations can be managed as if they were a simple mechanical

system operating in a predictable environment And the methods associated with it such as variance analyses and data tables that are used to measure and communicate performance are completely inadequate Instead Morlidge argues performance reporting should be reconceived as an act of perception conducted on behalf of the organisation helping to make sense of the sensory inputs data that it has at its disposal And to do so effectively performance reporters need to learn from and exploit the strengths of our own brains compensate for its weaknesses and communicate in a way that makes it easy for their audience s brains to assimilate Drawing on the latest insights from cognitive science in this book you will learn how to bring a dynamic perspective into performance reporting how to deploy a set of simple tools to help speared the signal from the noise inherent in large data sets and to make sound inferences how to set goals intelligently about the grammar of data visualization and how use it to design powerful and simple reports In this way information professionals are uniquely charged with the responsibility for creating the shared consciousness that is a prerequisite for organisations to effectively respond and adapt to their environments
