Selling and Negotiation Skills Prashant Chaudhary, 2024-10-17 This book is a complete guide to learning the critical selling and negotiation skills to gain a competitive edge in a challenging business environment. The volume covers various negotiation approaches, strategies, tactics, and styles that are adaptable and compatible with emerging business models and technologies. Businesses worldwide are adapting to changing consumer behaviour and focusing on more sustainable and future-ready selling and negotiation strategies. Richly illustrated with examples from diverse domains and real-life situations for an easy understanding of the subject, this book looks at strategies, tactics, and styles for negotiation and the tools or technologies used for effectively selling business cases and scenarios that illustrate the direct application of concepts, making the book practical, accessible, and relevant. Customer-centric selling and negotiation strategies, processes, and approaches. A valuable companion for students, teachers, research scholars, and professionals working in sales, business, and management. This revised edition will also be of interest to those working in the areas of global business and trade, international affairs, marketing, and economics. , *Countering Hybrid Threats Against Critical Infrastructures* Dorin Radu, Mirsada Hukić, Ashok Vaseashta, 2025-04-30 This proceedings volume presents a collection of articles from key practitioners from relevant areas with experience in critical infrastructure. The authors acknowledge that the responsibility for critical infrastructure protection is primarily a matter of international importance; hence, a high degree of cross-border and cross-sectoral interdependencies must be coordinated or where appropriate, legally harmonized efforts at the international level, including the smooth functioning of the internal policies. The book focuses on countering hybrid threats that render critical infrastructures vulnerable. An understanding of such threats will render critical infrastructure safe, secure, and resilient. The protection of national critical infrastructures, as well as of the functions and services critical to the proper functioning of society, is a key priority and requires a new, unique, and strategic approach. Work in this direction must consider the strong interdependencies between the various critical functions and services, including financial services, the key role of the private sector, the changing security environment, and emerging risks both in the physical and cyber fields. In addition to legal requirements, agreements should be promoted with private sector infrastructure and service owners and operators to ensure the continuity of and access to critical services, including beyond force majeure, by ensuring an acceptable level of preparedness to respond to all relevant threats, as well as the flexibility to address and mitigate the effects of low-probability, high-impact events. *The Co-evolution of Technology and Warfare* Tracey German, Fotios Moustakis, Andrew N. Liaropoulos, 2025-09-30 This book explores the relationship between technology and warfare by examining how recent technological advancements have revolutionized the conduct of war. The work analyses contemporary conflicts, including the Syrian civil war, the Taliban takeover in Afghanistan, and the ongoing war in Ukraine, but also by exploring future war scenarios and assessing the military capabilities of major powers. In doing so, the book highlights the dynamic and evolving

nature of modern warfare It goes beyond a simple examination of technological advancements addressing the complexities of modern warfare scrutinizing the strategies employed by states to adopt and develop military technologies while emphasizing the importance of technology in shaping military planning training research and innovation The book provides a collection of timely contributions by leading scholars and practitioners in the military and security field Furthermore the contributors identify potential challenges and risks associated with the widespread adoption of technologies in warfare and propose recommendations for policymakers to address issues that relate to military planning and training research and development and resilience building This book will be of much interest to students of security studies technology studies defence studies and International Relations The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
