Derek Bose,2006-11-14 Convenient coincidences and glycerine tears star crossed lovers and happy endings mindless songs and energetic dances These elements and more have sustained the Bollywood brand of cinema for nearly a century so much so that it has now found acceptance across continents This book is a road map for the fast changing entertainment landscape of India It succinctly outlines how film entertainment in India is no longer just an artistic or creative enterprise This is due to the rapid convergence of various media home video satellite television radio Internet animation and gaming which determines the success or otherwise of films The author contends that the most successful film makers will be those who recognise the consolidated potential of these revenue streams as opportunities to be tapped for maximising results so much so that it would be impossible to produce a flop Based on original research and personal interviews and discussions with film makers media professionals and market players this book is also backed by solid data from a variety of surveys audit studies and annual reports available in the public domain By sifting through and collating inputs from such sources the author arrives at concrete conclusions that place the issue of media convergence within the framework of film development something that has not been attempted before
