How Short-Form Videos On Social Media Platforms Became A Global Content Phenomenon, How Short-Form Videos On Social Media Platforms Changed People's Lives, And How To Earn Revenue As A Content Creator Of Short-Form Video Content On Social Media Platforms Dr. Harrison Sachs, 2025-11-04 This essay sheds light on how short form videos on social media platforms became a global content phenomenon explicates how short form videos on social media platforms changed people's lives and expounds upon how to earn revenue as a content creator of short form video content on social media platforms Short form videos on social media platforms became a global content phenomenon amid the 21st century

There are a multitude of reasons as to why short form videos on social media platforms became a global content phenomenon during the 21st century. The reasons as to why short form videos on social media platforms became a global content phenomenon amid the 21st century extend beyond the ambit of most people having a short attention span. As of September of 2025, it was estimated that the average human attention span was about 8.25 seconds, which is almost 18% shorter than a 10-second attention span. Another reason as to why short form videos on social media platforms became a global content phenomenon during the 21st century is attributable to short form videos on social media platforms being easily accessible to people. As of November of 2025, most short form videos on social media platforms are typically not relegated to a social media subscription service video library. As of November of 2025, most short form videos on social media platforms can be watched without a person needing to acquiesce to paying social media channel membership fees to be able to watch them. This is because social media platforms are typically inundated with advertisements. Social media platforms and the internet are easily accessible to people. This is because people can access social media platforms and the internet remotely via their smartphones without needing to be metaphorically tethered to their computers to do so. Furthermore, people can also access social media platforms and the internet remotely via their smartphones at anytime without needing to wait until standard business hours to do so. Another reason as to why short form videos on social media platforms became a global content phenomenon during the 21st century is attributable to short form videos on social media platforms being able to divert people's attention away from honing in on real world stressors. Engaging in real world experiences can precipitate the onset of acute stress, whereas indulging in watching engrossing short form videos on social media platforms can potentially help people to experience stress alleviation. Watching engrossing short form videos on social media platforms can not only provide a stimulating and exhilarating experience for people to indulge in experiencing but can also divert their attention away from dwelling on stressors. It is insalubrious for people to dwell on stressors since doing so can not only amplify their cortisol levels and adrenaline levels but can also undermine their well-being, put a damper on their mood, adversely impinge on their immune system health, elevate their blood pressure, increase their heart palpitation rate, and render them more prone to contracting headaches. People are less apt to succumb to experiencing negative emotions when they are indulging in watching short form videos on social media platforms that allow them to divert their attention away from dwelling on stressors. People resort to profusely watching engrossing short form videos on social media platforms since it can allow them to experience stress alleviation. Most people are eminently reticent about coping with experiencing any form of stress and would prefer to summarily alleviate their stress once they encounter a stressor. Another reason as to why short form videos on social media platforms became a global content phenomenon during the 21st century is attributable to short form videos on social media platforms being perceived to be more enthralling to watch than long form videos on social media platforms. This is because short form videos on social media platforms often succinctly showcases a video concept and are at a lower

probability to verbosely showcases a video concept than long form videos on social media platforms As of November of 2025 most people are at a higher probability to forgo watching long form videos on social media platforms in their entirety that verbosely showcases a video concept
