increasing confidence in mRNA technology could be the key to improving vaccination rates While healthcare and public health organizations are commonly involved in vaccine promotion a crisis like the COVID 19 pandemic requires a more holistic approach that incorporates vulnerable communities employment settings places of worship and other trusted sources in promoting vaccinations and reducing the spread and impact of COVID 19 Engaging trusted leaders in non healthcare settings may be the key to increasing confidence in mRNA technology and improving the low rate of COVID 19 vaccine uptake These non traditional settings may help improve communication and vaccine literacy surrounding COVID 19 mRNA vaccines and other innovative platforms while also improving access to vaccines by meeting people where they are It is clear that different communities face different rates of COVID 19 and hospitalization Therefore developing tailored approaches to engage these communities could aid in mitigating the impact of COVID 19 The goal of this Research Topic is to publish a collection of data driven research articles that focus on strategies to engage different populations in vaccine education to increase vaccine confidence and vaccine uptake This Research Topic welcomes but is not limited to submissions of Original Research Review Mini Review Systematic Review General Commentary and Brief Research Report articles pertaining to the following subtopics Approaches to engage non traditional settings in vaccine education Implementation and evaluation of interventions to increase vaccine uptake outside of health care and public health settings Public health and economic consequences of public engagement with non healthcare settings for vaccine education Developing a systematic diagnostic tool for COVID 19 risk in non healthcare settings Empirical research on vaccine education among specific populations such as immunocompromised groups and across different employment sectors Approaches for supporting the public with COVID 19 risk assessments Strategies and initiatives aimed at combating vaccine hesitancy among employees and staff Dr Heidi Larson receives research grants from GSK Moderna and Merck related to the the topic Jia Hu at 19 to Zero has received funding from Moderna Pfizer Sanofi Merck GSK Medicago within the past year related to the topic The other Topic Editors declare no other competing interests with relation to this topic theme We acknowledge the funding of the manuscripts published in this Research Topic by Praxis Health formerly 19 to Zero We hereby state publicly that Praxis Health has had no editorial input in articles included in this Research Topic thus ensuring that all aspects of this Research Topic are evaluated objectively and unbiased by any specific policy or opinion of Praxis Health Praxis Health is a health not for profit that collaborates with a diverse range of partners to drive meaningful change and improve the health of communities receiving a wide range of funding from industry partners and public granting agencies [Integrating Social Media into Business Practice, Applications, Management, and Models](#) Lee, In, 2014-06-30 This book provides the most up to date research findings and future directions for customer relationship management in contemporary enterprises covering a wide range of topics such as management issues innovative ideas state of the art business applications and evaluation of social media products and services Provided by publisher *Electronic America* Laurie DiMauro, 2009 *Hackers and Hacking*
