ELIZA: Is something troubling you ?
YOU:  Men are all alike.
ELIZA: What is the connection, do you suppose ?
YOU:  They're always bugging us about something or other.
ELIZA: Can you think of a specific example ?

Mejias, Yavuz Akdağ, 2025-07-01 The world is undergoing one of the most profound transformations in modern history a transition from an international system shaped primarily by military and economic might to one increasingly dominated by technological power Artificial intelligence quantum computing cyber capabilities advanced robotics and data sovereignty have become the new frontlines of global competition This transformation is not merely technical it is deeply political economic social and strategic It is giving rise to what scholars and analysts are increasingly calling a technopolar world order in which those who master key technologies shape the direction of global affairs At the heart of today's global economic realignment lies the centrality of technology as the primary driver of value creation competitiveness and resilience Traditional sources of economic power natural resources industrial capacity or even financial clout are increasingly subordinated to control over data flows algorithmic infrastructures digital platforms and advanced manufacturing capabilities The rise of the intangible economy driven by artificial intelligence cloud computing and smart automation has created new economic fault lines between technological haves and have nots The countries that dominate semiconductor supply chains AI development and digital services are fast becoming the new centers of gravity in the global economy For states falling behind in technological innovation is no longer a manageable disadvantage it is an existential threat to national competitiveness productivity and security The rapid pace of change leaves no room for complacency Economic dependency on foreign technologies whether in telecommunications AI or defense systems renders states vulnerable to strategic coercion and economic disruption As such states find themselves compelled to invest heavily in indigenous innovation digital sovereignty and resilient supply chains even at great economic and political cost In Türkiye these trends are acutely felt The country has actively embraced the economic opportunities presented by emerging technologies by fostering a vibrant start up ecosystem expanding its national AI strategy and investing in advanced defense technologies through firms like Baykar Technologies and ASELSAN New initiatives such as TOGG Türkiye's first domestically produced electric vehicle and the growth of biotechnology and fintech sectors exemplify efforts to diversify the economy Emerging technologies are also transforming the political dimensions of state power and sovereignty Technologies such as semiconductors 5G infrastructure cloud computing and big data are no longer neutral tools of efficiency they have become strategic assets wielded by states and corporations alike as instruments

of foreign policy economic leverage and geopolitical coercion The weaponization of technology is now visible in the use of export controls on semiconductors data localization demands and the strategic positioning of data centers and digital infrastructures as sites of influence and contestation The ongoing U S China technology rivalry battles over AI supremacy and control of critical supply chains highlight the extent to which technological dominance has become a key determinant of international influence The social impacts of emerging technologies are equally transformative Digital platforms now mediate not only commerce and communication but also political participation identity formation and social organization Technologies such as AI powered content algorithms deepfakes and digital surveillance are reshaping public discourse often deepening societal polarization and creating vulnerabilities to misinformation cyber manipulation and digital authoritarianism Perhaps the most rapid and consequential changes are occurring in the military and security domain Technologies such as artificial intelligence drone warfare cyber operations and space based systems are revolutionizing how conflicts are waged and how deterrence is maintained The recent return of Donald Trump to the U S presidency is widely expected to accelerate the militarization of artificial intelligence with greater investment in autonomous weapons cyber offense and AI enhanced command systems This development signals the onset of a more volatile strategic environment where AI enabled military competition which will also lead to an increased security dilemma within the international system will intensify not only between major powers but also in contested regions where middle powers play an increasingly prominent role Across all these domains one reality becomes clear the speed and scale of technological change leave states with no viable alternative but to adapt The costs of technological disengagement are simply too high In today s rapidly evolving landscape not engaging in the race for technological advancement is equivalent to strategic self marginalization economically politically socially and militarily For middle powers like T rkiye this environment presents both opportunities and risks By investing in strategic technologies participating in global norm setting processes and building national resilience T rkiye can avoid the pitfalls of dependency and carve out a role as a rule maker rather than a rule taker in the technopolar age For T rkiye the technological revolution represents not only a necessity but an opportunity an opportunity to strengthen national sovereignty build economic resilience and advance an autonomous foreign policy in an increasingly fragmented and competitive world This strategic push is guided by the recognition that remaining on the periphery of the technological revolution is not an option T rkiye sees this transformation not as a threat but as an opportunity specifically a means to reinforce national sovereignty enhance economic security and assert greater autonomy in foreign policy This special issue of Insight T rkiye brings together scholars and experts who explore these themes in depth Through analyses of T rkiye s defense innovation digital transformation regulatory approaches and foreign policy recalibrations this volume offers critical insights into the challenges and possibilities of the technopolar age This issue starts with a valuable commentary from the Minister of Industry and Technology of T rkiye Mehmet Fatih Kac r In his commentary T rkiye s National

Technology Move is framed as a decisive and timely response to global industrial and geopolitical transformations. This integrated approach positions Türkiye as a trusted producer, global partner and an inspiring model for emerging economies navigating the complex dynamics of a technology driven 21st century world order. This issue starts with a valuable commentary from the Scientific and Technological Research Council of Turkey (T.B.TAK). As the President of T.B.TAK, Orhan Aydın details in his commentary, T.B.TAK spearheads efforts in high tech production, digital and green transitions and global competitiveness. Notable milestones include the development of a national supercomputer, a Turkish Large Language Model, breakthroughs in quantum sensing and post quantum cryptography and the successful launch of the indigenous satellite T.RKSAT 6A. This special issue besides its main focus on Türkiye has tried to provide a special framework in terms of technological developments taking place globally especially in regard to the U.S.-China rivalry and the developments taking place in these countries. Within this perspective, Chuanying Lu's analysis focuses on the institutionalization of digital geopolitics amid the ongoing U.S.-China technological rivalry. Lu argues that the strategic indispensability and generality of digital technologies have not only reshaped traditional international relations but have also established digital geopolitics as an emergent field where technological capabilities serve as the new currency of state power. Lu's work raises critical questions about the strategic assets at stake and whether this rivalry will evolve into a tech Cold War with profound implications for the future international order. Concurrently, Liu Guozhu provides a comprehensive overview of China's innovation ecosystem emphasizing its distinctive structure driven by enterprises, national laboratories, research institutes and universities. Liu's analysis underscores how China's coordinated innovation system plays a central role in sustaining its technological ascendancy. Katherine Chandler's commentary underscores several critical insights about data in deep learning and AI particularly in conflict settings. She emphasizes that the global supply chain concept extends beyond hardware like semiconductors to include data itself which unlike natural resources are representations and require different treatment. Using ChatGPT's analysis of Sahel conflicts, Chandler highlights the limitations of large language models in managing complexity and uncertainty. The paper warns that ignoring data collection challenges and ongoing uncertainties in conflict zones will undermine military AI effectiveness. Ultimately it calls for a global debate on the role of military AI stressing that technology alone cannot address these complex issues. Dolapo Fakuade's commentary explores the dual edged nature of AI in intercultural communication. While AI holds great promise for bridging cultural barriers, fostering mutual understanding and connecting diverse populations, it also introduces challenges such as algorithmic bias and the broader social consequences of digital transformation. Through regional examples, Fakuade highlights that AI may pose more risks than opportunities if not adopted and governed with care. In another commentary, Anicia Peters reflects on the 2025 Antalya Diplomacy Forum which took place amid heightened geopolitical tensions and a superpower race in artificial intelligence. The forum emphasized Türkiye's diplomatic role in fostering equitable partnerships particularly with African nations and promoting both North-South

and South South cooperation At the same time Peters analyzes challenges for Africa such as poor data quality infrastructural limitations talent gaps and weak regulatory frameworks in terms of the African technological development Erman Ak Il and Gloria Shkurti zdemir s article examines T rkiye s pursuit of technological sovereignty and strategic autonomy in response to decades of dependency and embargoes Under President Erdo an s leadership T rkiye has initiated a broad technological transformation developing indigenous defense systems AI models and national algorithms This strategy aims to reduce foreign reliance enhance resilience and assert influence in the emerging technopolar world The article highlights T rkiye s shift from technology importer to innovator and norm shaper positioning the country as an active digital power shaping the new global order Kamil Tarhan s article examines T rkiye s cybersecurity policies in an era where digital capabilities are critical to national security and global influence The study focuses on efforts to secure critical infrastructure strengthen digital sovereignty through comprehensive legislation and institutional development and invest in domestic technology production Tarhan also explores the role of AI in mitigating cyber risks and draws comparisons with the cybersecurity strategies of other emerging powers The article portrays T rkiye s efforts to safeguard its digital domain and assert itself as a significant actor in global cyber governance within an increasingly technopolar world Fatih Sinan Esen s contribution highlights T rkiye s strategic use of AI as a tool for national competitiveness and security in a technopolar era Esen documents T rkiye s transition from being a technology importer to becoming an active innovator particularly in sectors such as defense healthcare and education Emphasizing inclusive AI human capital development and data governance the article places T rkiye s AI strategy within the broader geopolitical and regulatory context Military remains the main sector which is first and foremost impacted by the emergence of the new technologies Within this perspective Ozan Ahmet etin s study analyzes differing national priorities in AI development through a comparison of T rkiye and the United Arab Emirates UAE The research reveals given resource constraints states often prioritize proven AI solutions that address immediate needs T rkiye emphasizes AI for counter terrorism while the UAE addresses labor shortages Still maintaining the focus on the military domain Mehmet Emin Erendor and Emre tak examine the transformative impact of autonomous weapons and AI integrated systems on modern warfare with particular focus on AI supported killer drones The study explores how AI enabled drones impose strategic pressure on adversaries and provoke new forms of deterrence and countermeasures offering critical insights into the future of warfare and military doctrine In another research article G khan Bozba explores the innovative integration of defense technologies such as drones sensor networks and AI into T rkiye s agricultural sector to enhance productivity sustainability and resilience T rkiye s defense agriculture integration is presented as a replicable model for other emerging economies emphasizing the need for multi sectoral collaboration to drive sustainable rural development 2024 was an important year for T rkiye in terms of its space program It r Toks z investigates the concept of technopolarity to describe a world where powerful technology companies increasingly rival the authority of nation states particularly in the space domain

By contrasting the U S model of market driven technological power with China s state centric approach Toks z examines how an emerging space nation like T rkiye can navigate this complex environment Besides space domain sea domain is another one where technology is having a great impact Within this context Ahmet zkan and Meysune Ya ar analyze T rkiye s naval modernization between 2011 and 2024 through the lens of offense defense balance theory and emphasize the critical role of technology in T rkiye s pursuit of becoming a rising naval power Following with another article Cenay Babao lu and Ecem Buse Sevin ubuk examine AI s dual role in global governance The article assesses the U S China AI rivalry and the European Union s regulatory leadership through the EU AI Act While T rkiye is not yet a major AI developer it is emerging as a regional mediator and soft balancer through its diplomatic engagements and AI initiatives leveraging its unique geopolitical position to shape international tech governance norms Nezir Akye ilmen and Yavuz Akda explore the potential for creating a holistic accountable and effective global digital governance framework amid escalating geopolitical tensions and regulatory fragmentation Drawing on Joseph Nye s regime complex theory and the Internet Governance Forum s IGF multi stakeholder model the article argues that a strategically recalibrated IGF can improve legitimacy and inclusivity in global internet governance As mentioned earlier AI is impacting the global and regional politics more than any other technology Helder Ferreira do Vale evaluates AI regulation across BRICS countries using a typology of governance models and an AI Readiness Index grounded in national laws and strategies The study finds China best prepared to regulate AI with Brazil India and South Africa facing significant implementation challenges and Russia trailing behind Mustafa B y k s research compares ideological orientations and algorithmic biases in AI models from Eastern and Western perspectives by analyzing ChatGPT 4 and DeepSeek R1 The study reveals that Western AI emphasizes values like individual freedom and transparency while Eastern AI tends to reflect collective state centered principles The findings challenge the assumption of AI neutrality and underline AI s growing role in shaping global ideological narratives and digital norms Lastly while technology remains the highlight of the developments in international affairs unfortunately the Middle East region has once again witnessed another war In this issue through the commentary of Hakk Uygur we brought to our readers a brief analysis of Israel s simultaneous air cyber and covert strike against Iran on June 13 2025 This operation exemplifies how the integration of cutting edge military technologies with advanced intelligence capabilities is reshaping regional security dynamics in the Middle East Furthermore the commentary assesses T rkiye s mediation initiatives and the heightened defense postures across the region which collectively influence the evolving balance of power We hope that these contributions will inspire further scholarship dialogue and policy innovation to help ensure that the future of technology serves not only the interests of power but also the broader goals of stability cooperation and human well being

AI Strategies for Social Entrepreneurship and Sustainable Economic Development Yu, Poshan, Wong, Steve K.M., Prabhakar, Akhilesh Chandra, 2024-12-26 While the 20th century saw massive successes in terms of industrialization much of the world s population was excluded from the spoils

of these endeavors and often directly exploited in their achievement Simultaneously the environmental impact of these practices has done irreparable harm to our world Now nearly a quarter through the 21st century we must ensure that the same mistakes are not repeated and that we use recent technological developments such as artificial intelligence to more evenly distribute earnings and resources while also ensuring that our environment is protected AI Strategies for Social Entrepreneurship and Sustainable Economic Development explores the intersection of inclusive innovation artificial intelligence AI strategies social entrepreneurship and sustainable economic development The book delves into how AI technologies can be leveraged to promote social inclusion drive entrepreneurship and foster sustainable economic growth in diverse contexts This book contribute to the existing literature by providing insights into the potential of AI in advancing inclusive innovation and sustainable development Offering practical strategies case studies and best practices this book is an excellent resource for policymakers researchers practitioners and students interested in the intersection of AI social entrepreneurship and economic development

The Artificial Intelligence Chatbot Lon Safko,2019-05-30 Can you tell the difference between chatting with a human or chatting with a robot I will bet you can t Artificial Intelligence Chatbots have surpassed the Turing Test and are interfacing with us everyday Did you know more people will chat with a bot nearly 1 000 more often than to use your Contact form Did you know how a chatbot can identify your prospects by psychological profiles and give them what the need to close the sale Are you aware that chatbots can help you find errors in your web site making your web sit 100 more sticky and answer your prospects questions that immediately leads to a sale Let me show you how an A I Chatbot will encourage your customers to tell you how to sell to them and increase your revenue up to 30% Along with my background in A I I recently studied more than 2 000 A I Chatbot conversations with 22 000 interactions and discovered dozens of completely unexpected positive consequences of having an A I chatbot assisting your customers on your web site Read how easy it is to install and customize your very own A I Chatbot and see the positive effects for yourself

Build a Website with ChatGPT Paul McFedries,2024-10-01 Create a portfolio of cool and creative

websites all without having to write your own code Build a Website with ChatGPT teaches you zero coding web development utilizing powerful generative AI tools like ChatGPT If you can open a web browser you re ready to start building absolutely no coding experience required Inside Build a Website with ChatGPT you ll learn the important skills of AI assisted web programming such as Crafting effective prompts to generate HTML CSS and JavaScript Converting text into images with DALL E integration Building navigation bars image galleries and contact forms Deploying fully functional sites to the web for free Customizing the generated code for unique sites Inside Build a Website with ChatGPT you ll learn the high level coding concepts that let you check and perfect AI output prompting skills that deliver the exact code you need and how to properly deploy your site to the web for free Annotated code samples and advice on code customization give you the perfect balance of understanding and convenience Plus you ll get access to a tried and tested repository of prompts and working code About the technology You can build amazing websites even if you don t know HTML CSS and JavaScript Just describe what you want in plain English and let ChatGPT take care of the gnarly details This book guides you step by step as you create user friendly forms interesting graphics and interactive web pages using nothing but AI and your imagination About the book Build a Website with ChatGPT shows you how to make websites in an AI first world no experience required You ll start with the basics of generating pages with ChatGPT and by the end of the second chapter your first site will be up and running Author Paul McFedries then shows you how to add interesting text and graphics forms for user input and even custom CSS to give your pages some pizzazz As you go you ll expand your new AI skills to create photo galleries portfolios catalog pages and more What s inside Writing effective prompts to create code text and graphics Adding navigation bars image galleries and contact forms Deploying your sites to the web for free Adding your unique touches to AI generated pages About the reader No experience with web development or programming required If you can create a Word document you can build a website About the author Paul McFedries has written over 100 books on web development and other technology topics including Web Design Playground Manning Publications The technical editor on this book was Anirudh V Prabhu Table of Contents 1 Introducing website creation with ChatGPT 2 Creating and deploying your first web page 3 Working with fonts colors and headings 4 Adding structure to a page 5 Publishing page posts 6 Adding links and navigation 7 Creating site content 8 Generating site forms 9 Adding lists to your pages 10 Setting up a photo gallery 11 Creating a portfolio page 12 Building an article page 13 Coding an interactive course catalog A Getting ready to build web pages with ChatGPT B Deploying your site C Learning a few ChatGPT best practices [Getting Started with Chatbots](#) Akhil Mittal,2019-09-20 A complete guide to build a better Chatbots DESCRIPTION This book makes you familiar with the concept of the chatbot It explains what chatbot is how does a chatbot work and what exactly is the need for a chatbot in today s era It focuses on creating a bot using Amazon s Lex service and getting the bot deployed on Facebook messenger for live chatting This book will train you on how to create a chatbot using Google s Dialogflow and test the bot in Dialogflow console It also demonstrates how to create a

custom chatbot using Microsoft's bot framework and enable the webhooks in Dialogflow and return the response from the custom bot to Dialogflow intents as a fulfillment response

KEY FEATURES

Concept of artificial intelligence AI and machine learning How AI is involved in creating chatbots What are chatbots Chatbot development Live chatting Create chatbot with technologies such as Amazon Lex Google Dialogflow AWS Lambda Microsoft Bot Framework and Azure Deploy and talk to your bot

WHAT WILL YOU LEARN

Learn the concept of chatbot Learn how chatbots and AI work hand in hand Learn the concept of machine learning in chatbots Get familiar with chatbot services such as Amazon's Lex and Google's Dialogflow Learn how to write an AWS Lambda function Learn what webhooks are Learn about Microsoft's Bot Framework Write your own custom chatbot Deploy the chatbot on Facebook Messenger Google Assistant and Slack Live chatting with your own chatbot

WHO THIS BOOK IS FOR

The developers architects and software technology enthusiasts who are keen to learn the cutting edge technologies and want to get a hands on experience on AI by creating their own custom chatbots Organizations small companies service based product based setups which want to learn how to create a basic chatbot on their website and on social media to get more leads and reach to the end user for their business Students if they are seeking something where they can create and integrate the real time chatbots in their projects

Table of Contents

Section 1 The Concept 1 What are Chatbots 2 How Chatbot Works 3 What is the Need for a Chatbot 4 Conversational Flow

Section 2 Creating a Chatbot Using Amazon Lex 1 Amazon Lex and AWS Account 2 Create Bot Using Amazon Lex 3 AWS Lambda Function 4 Slots 5 Error Handling 6 Deploy the Bot on Facebook Messenger 7 Live Chatbot on Facebook

Section 3 Creating a Chatbot Using Dialogflow API and Microsoft's Bot Framework Technical Requirements 1 Dialogflow Account 2 Creating a Bot in Dialogflow 3 Dialogflow Console 4 Integrating the Bot with Slack 5 Chatbot Using Microsoft Bot Framework 6 Publishing the Bot from Visual Studio to Azure 7 Register the Bot 8 Dialogflow v2 SDK 9 Webhooks in Dialogflow 10 Testing the Bot 11 Deploy the Chatbot in Facebook Messenger 12 Live Chatbot on Facebook 13 Deploy the Chatbot in Slack

Chatbot Building for Beginners

Amara Hawthorn, 2025-09-17 Chatbots are everywhere answering customer questions booking appointments and making apps more interactive But do you need a PhD in AI to build one Absolutely not This beginner friendly guide shows you how to create your own chatbots and conversational assistants step by step without getting lost in complicated algorithms or heavy math Using practical tools and clear examples you'll go from idea to working chatbot in no time Inside this book you'll discover how to Understand how chatbots work without complex theory Build simple chatbots for websites apps or messaging platforms Use no code and low code tools to design conversations quickly Add personality and natural responses to your bots Connect chatbots to APIs and services for real functionality Deploy and test your chatbot so it's ready for real users Who this book is for Beginners curious about chatbots and conversational AI Students entrepreneurs and hobbyists wanting to build bots without advanced coding Developers looking for a fast practical entry point into chatbot projects By the end you'll have the skills and confidence to create your own working chatbots and the foundation to explore more advanced

guidance to integrate Claude's API and OpenAI's latest function calling capabilities into your agents. Work through examples of Claude API integration and GPT-4 tool use so your AI can search documents, call web services, and execute code seamlessly.

Agent Frameworks with Claude/OpenAI Explore leading agent orchestration frameworks and techniques. You'll connect agent frameworks with Claude/OpenAI models using LangChain and open source adapters, and compare approaches like OpenAI's functions vs. Anthropic's Claude for building flexible agents.

Multi-Step Workflows and Tools Design tool-enhanced workflows that chain LLM reasoning with multi-step tool usage. Build agents that read PDFs, query SQL databases, scrape the web, and summarize content with citations, then output results to reports or emails. Each project is broken down into clear step-by-step tasks for easy follow-along.

LangGraph and CrewAI Orchestration Orchestrate complex tasks with multi-agent systems. Learn to coordinate LangGraph agents (DAG-based flows) and CrewAI role-based teams leveraging MCP to share context and tools. The book demonstrates how frameworks like LangGraph and CrewAI can be supercharged with MCP for scalable collaborative agents.

Deployment Infrastructure Get practical advice on deploying production-grade AI infrastructure. Containerize your agents with Docker and integrate into CI/CD pipelines. Deploy on cloud platforms (Railway, Render, AWS) with authentication and monitoring, ensuring your AI agents are secure and ready for real-world agent deployments.

New in the 2nd Edition Latest APIs, Models Updated, examples featuring Claude's newest capabilities and OpenAI's evolving API. GPT-4, GPT-3.5 Turbo updates, function calling, etc. so you're working with state-of-the-art tools.

n8n Workflow Integration A brand new chapter on using n8n no-code automation as an MCP host. Learn to plug your AI agents into enterprise workflows and automation pipelines with ease.
