Coverage includes in depth analysis of emerging technologies and innovations across various sectors of financial services as well as the entrepreneurial finance of FinTech such as funding valuation and startup management. The first book to examine the economic principles of FinTech innovation. Comprehensive coverage of financial technologies across various sectors in financial services. Ideal for undergraduate and graduate students as well as entrepreneurs investors and finance professionals. Instructor resources include solutions slides and case studies.

The AI Music Problem Christopher W. White, 2025-06-16 Music poses unique and complex challenges for artificial intelligence even as 21st century AI grows ever more adept at generating compelling content. *The AI Music Problem: Why Machine Learning Conflicts With Musical Creativity* probes the challenges behind AI generated music with an investigation that straddles the technical the musical and the aesthetic. Bringing together the perspectives of the humanities and computer science the author shows how the difficulties that music poses for AI connect to larger questions about music artistic expression and the increasing ubiquity of artificial intelligence. Taking a wide view of the current landscape of machine learning and Large Language Models *The AI Music Problem* offers a resource for students researchers and the public to understand the broader issues surrounding musical AI on both technical and artistic levels. The author breaks down music theory and computer science concepts with clear and accessible explanations synthesizing the technical with more holistic and human centric analyses. Enabling readers of all backgrounds to understand how contemporary AI models work and why music is often a mismatch for those processes this book is relevant to all those engaging with the intersection between AI and musical creativity today.
