Creative AI Tools and Ethical Implications in Teaching and Learning Keengwe, Jared, 2023-09-18 As generative Artificial Intelligence AI tools become increasingly prevalent it is crucial for educators to develop a nuanced understanding of the ethical implications associated with their use Educators today face the critical task of navigating the pedagogical applications of AI and maximizing its potential to foster student learning Creative AI Tools and Ethical Implications in Teaching and Learning is an insightful exploration of the ethical considerations surrounding the integration of AI in education Educators may fear how it will rapidly transforming the educational landscape but this book serves to support them and delves into the opportunities and challenges that arise when leveraging AI to enhance teaching and learning experiences Creative AI Tools and Ethical Implications in Teaching and Learning goes beyond theory to offer practical strategies for integrating AI creatively into the classroom From learning analytics and educational data mining to AI game activities and generative AI tools like ChatGPT this book equips educators with the knowledge and resources to adapt AI technologies to support teaching and learning effectively Moreover the book explores the vital connection between AI and student assessment highlighting how AI can enhance the evaluation process while maintaining fairness and objectivity It concludes with an insightful glimpse into the future of AI in education envisioning the transformative possibilities that lie ahead This comprehensive guide provides educators researchers and policymakers with the tools they need to navigate the complexities of AI in education

Artificial Intelligence in Education Ben Du Boulay, R. Mizoguchi, 1997 The theme of this book is Knowledge and Media in Learning Systems and papers that explore the emerging roles of intelligent multimedia and distributed technologies as well as computer supported collaboration within that theme are included The spread of topics is very wide encompassing both well established areas such as student modelling as well as more novel topics such as distributed intelligent tutoring on the World Wide Web Far from undermining the need to understand how learning and teaching interact the newer media continue to emphasise the interdependence of these two processes Collaboration and tools for collaboration are the major topics of interest Understanding how human learners collaborate how peer tutoring works and how the computer can play a useful role as either a more able or even a less able learning partner are all explored here
