Expert Ai Transcription Tool Tips For Us Audience:

The AI Mirror Shannon Vallor, 2024 For many AI technology inspires hope for the future the promise of shared human flourishing and collective liberation from drudgery that defines the good life but always seems to elude our species Yet today's AI technology is forged from human generated data into immensely powerful but flawed mirrors that endlessly reflect the same errors biases and failures of wisdom we are striving to escape To open new futures for ourselves with these tools is as misguided as gazing into a mirror while trying to climb an uncharted mountain At this crucial juncture for humanity and our planet we need something new from AI and more importantly from ourselves We need to find new hope not to surrender our greatest moral and intellectual ambitions to machines that have none but to renew those ambitions collectively for ourselves Shannon Vallor makes a wide ranging prophetic and philosophical case for what AI could be and what we can be with it She calls us to reclaim our human potential for moral and intellectual growth rather than losing sight of our shared humanity as we gaze dully into our AI mirrors

Insights on Science Journalism Felicity Mellor, 2024-03-14 Bringing together experts from a range of disciplines this collection critically examines science journalism paying special attention to the points of tension that science journalists navigate in their work today Faced with the twin crises of climate change and a global pandemic science journalism has never before been so prominent This book showcases perspectives that transcend the particulars of the

specific news events and outlets studied in order to provide an overview of the key areas of scholarly interest regarding the nature of science journalism. The volume is organised into three sections: the first provides historical case studies illustrating the demarcation of science journalism from science as science journalism emerged as a recognisable news beat in the twentieth century; the second examines the relationship between science journalists and their sources, particularly scientists and the mediation of this relationship through organisations; foreign journalism and political constraints; and the final section considers the style and voice of science journalism content. Case studies and original empirical research are compiled from across the globe including the UK, US, Germany, Vietnam and Russia and are synthesised to offer a readable and engaging insight into the beat. *Insights on Science Journalism* is recommended reading for advanced students and researchers of science journalism and communication and will also appeal to those working in the fields of science and technology studies and risk communication.
