Artificial Intelligence, Humans and the Law Henrik Palmer Olsen, Jacob Livingston Slosser, Salome Addo Ravn, Johan Eddebo, Jonas Hultin Rosenberg, 2025-10-31 This book takes up the contentious issue of artificial intelligence AI and more specifically the evolving nature of AI mindedness as a legal entity in society With the increasing potential of AI suggested by the recent surge in creative and administrative tools and large language models there is a growing concern about the ethical and legal implications of incorporating AI into society As these systems become even more powerful and their ability to mimic human output grows the question of whether and how to attribute mental states to AI even in its most nascent form has

become a pressing concern. It is for example unclear what kind of mind AI might be capable of and therefore what the proper legal analogy might be for how we attribute reasoning capability, intent, responsibility, liability, agency and so on to it. This book contributes to this new and important area by bringing together front line research from diverse fields on the topic of understanding AI mindedness and how it and our relationship to it might be regulated. Through a collection of chapters written by experts from law, public administration, tort, psychoanalysis, philosophy, linguistics, computer science and political theory, this volume offers an insightful examination of current research, theoretical frameworks and practical applications that are shaping the AI human relationship. This book will be of considerable interest to scholars and researchers working in legal theory, socio legal studies, law and technology and science and technology studies.

The Oxford Handbook of the Sociology of Machine Learning Juan Pablo Pardo-Guerra, 2025-04. Machine learning, renowned for its ability to detect patterns in large datasets, has seen a significant increase in applications and complexity since the early 2000s. The Oxford Handbook of the Sociology of Machine Learning offers a state of the art and forward looking overview of the intersection between machine learning and sociology, exploring what sociology can gain from machine learning and how it can shed new light on the societal implications of this technology. Through its 39 chapters, an international group of sociologists address three key questions: First, what can sociologists yield from using machine learning as a methodological tool? This question is examined across various data types including text, images and sound, with insights into how machine learning and ethnography can be combined. Second, how is machine learning being used throughout society and what are its consequences? The Handbook explores this question by examining the assumptions and infrastructures behind machine learning applications, as well as the biases they might perpetuate. Themes include art, cities, expertise, financial markets, gender, race, intersectionality, law, enforcement, medicine and the environment, covering contexts across the Global South and Global North. Third, what does machine learning mean for sociological theory and theorizing? Chapters examine this question through discussions on agency, culture, human machine interaction, influence, meaning, power, dynamics, prediction and postcolonial perspectives. The Oxford Handbook of the Sociology of Machine Learning is an essential resource for academics and students interested in artificial intelligence, computational social science and the role and implications of machine learning in society.

The First Meeting Differentiator Lee B. Salz, 2025-09-30. The first meeting is where everything begins or ends. Get it right and you build unstoppable deal momentum. Get it wrong and the deal is in big trouble. Traditional discovery meetings must die. Today's buyer demands it. They no longer tolerate one sided sales interrogations that serve the seller but provide no value to them. If they agree to a meeting with you, they expect something more: a consultation experience that makes them wiser as a result of time spent with you. That's the transformation. The First Meeting Differentiator guides you to make it. In this breakthrough book, world renowned sales management strategist and bestselling author Lee B. Salz reveals the strategy and the step by step framework for transforming your first meetings into high impact, client centric consultations that differentiate you and lay the

foundation to win more deals at the prices you want This shift changes the entire buyer seller experience First meetings become energized trust building impactful conversations that ignite interest and set the stage for closing deals Following the success of Salz's bestsellers Sales Differentiation and Sell Different The First Meeting Differentiator adds a powerful new component to your sales strategy Packed with real world stories actionable insights and hands on workshops this is the ultimate guide to modernizing your sales approach and outselling the competition Design a first meeting strategy that excites prospects and earns their trust Use techniques that differentiate the meeting experience not just your product Shift from one sided discovery to dynamic consultations that deliver value for both sides Engage emotions in ways that motivate them to take action by leveraging Empathetic Expertise Master qualifying to separate real deals from mirages Create intriguing questions that qualify deals differentiate you and make consultations magical Stop talking about features and benefits and develop stories that captivate differentiate and lead them to want to buy from you Benny the Blue Whale Andy Stanton, 2023-11-02 AI is changing the world at frightening speed A bestselling author decides to find out more Something profound and utterly brilliant is going on hilarious THE TIMES Is ChatGPT the end of creative industries as we know them An ethical quagmire from which there is no return A threat to all our jobs as we keep hearing on the news Bestselling children's author Andy Stanton has made a career out of writing differently from the unconventional hero of his bestselling Mr Gum series to his penchant for absurdist plots his children's books are anything but formulaic When a friend introduces him to ChatGPT the new large language chatbot Andy is as sceptical as he is curious Can this jumble of algorithms really mimic the spontaneity of human thought Could it one day replace human authors like him for good And are we soon to be ruled over by despotic robot overlords He decides there's only one thing for it he must test this bot's capabilities Eventually he settles on a prompt that will push the algorithm to its creative limits tell me a story about a blue whale with a tiny penis Chaos ensues What follows is a surprising and illuminating battle between Andy and ChatGPT that maybe just maybe might help us all understand AI a little bit better Join Andy and his beleaguered AI lackey on a rollicking metafictional journey through the art of storytelling Presenting his prompts and the AI generated narrative alongside extensive commentary Stanton provides a startling paean to the art of a good story and boundless human creativity Hopeful and hilarious Benny the Blue Whale provides a joyfully anarchic meditation on AI literature and why we write A WATERSTONES AND NEW SCIENTIST BEST BOOK OF 2023 There's no book like it Scholarly childish fascinating and hilarious one of our funniest writers dissects what it takes to build a story and what that tells us about being human It'll really make you think if you can stop laughing Chris Addison co creator of BREEDERS Entertaining and alarmingly relevant provocative and philosophically satisfying it's ultimately a profoundly human text OBSERVER A magnificent experiment by a perfect fool deep and shallow and stupid and clever the perfect use of AI Andy Intelligence Robin Ince author of THE IMPORTANCE OF BEING INTERESTED Benny the Blue Whale is many things It's a fascinating discourse on the nature of language and storytelling It's a philosophical treatise
