application and impact of GenAI on education and language learning **Invent Ed** Caroline Field Levander, 2025-12-16 An essential guidebook on innovation in higher education and how we can ensure student success in college by looking to the history of American invention Invent Ed is a much needed contribution to the broad ecosystem of innovation creativity and higher education in America Our country s many generations of inventors from Benjamin Franklin to modern visionaries like Steve Jobs have made important new discoveries by putting existing knowledge into unexpected new combinations This inventive method has led to the discoveries that have made the nation a global power Influential educational leader Caroline Levander provides examples of how to integrate this creative method into the student experience She offers industry leaders regulators and parents valuable insight into how to make the American college experience all that it should be After tracing the riveting and forgotten history of invention in America Invent Ed provides a succinct and useful account of how American colleges rose to global prominence and how they operate today It then offers guidance on how to renew US higher education and thereby ensure the nation s ongoing vitality *Beyond Code* Daniel Plate, James Hutson, 2025-09-02 AI powered coding tools are revolutionizing software development transforming programming from a specialized skill into an accessible educational practice across disciplines This book investigates how tools such as Cursor AI GitHub Copilot and Replit s Ghostwriter are dismantling traditional barriers to entry for learners particularly those from non STEM backgrounds by enabling natural language code generation intelligent debugging and interactive project based learning Bridging the gap between theoretical instruction and practical application the book serves as both a guide and a critical framework for integrating generative AI into curricula It highlights how these tools expand the boundaries of programming education by supporting interdisciplinary applications from literary analysis to creative writing thereby making coding relevant and actionable for students in the humanities and beyond The book equips educators with the tools and strategies necessary to incorporate AI assisted programming into diverse academic contexts by offering lesson plans and adaptable project models This resource is essential for instructors seeking to demystify coding promote inclusivity in technical learning and reimagine the role of software literacy in the twenty first century classroom **Intro Guide To Concept of Ai Agent** Barron Wilson, 2025-06-06 So you want to know what AI agents are all about Great Think of this as your friendly easy to digest intro to one of the most exciting trends in tech today no jargon no complicated theories just simple ideas and real world examples An AI Agent isn t just a chatbot or a bot that follows strict rules It s more like a smart assistant that can understand your goals make plans use tools and even adapt when things don t go as expected Imagine telling an AI Find me the best flight to London next week and it actually figures out how to do that using different websites compares prices checks for availability and books it all on its own That s the power of an AI agent This guide breaks everything down into bite sized pieces so anyone can understand You ll learn What makes an AI agent different from regular bots How they work behind the scenes think of them having a brain powered by large language models a toolkit like APIs apps databases memory and a rulebook

your instructions Real life examples like AI assistants handling customer service or helping coders debug software How to start experimenting with automation using visual tools like n8n Zapier or Make no coding required Important safety tips because building smart systems also means thinking about ethics privacy and responsibility One of the coolest parts is seeing how multiple AI agents can work together like a team Just like humans divide up tasks AI agents can split up complex problems help each other out and get things done faster and smarter The guide also gives you a peek into the future where you can start building your own AI agents using development kits from big companies like Google But here's the key advice start simple Don't jump into complex systems unless you really need to Often a clear instruction or a basic workflow is all you need And if you're inspired and want to go further the book recommends diving into AI Agents Made Easy a hands on guide to building your own digital helpers using no code tools In short this pocket guide is perfect for beginners who want to understand AI agents see how they can change the way we work and take the first step toward building their own Whether you're a business owner student or just plain curious this is your doorway into the future of AI and it's already here

Artificial Intelligence in Animal Behaviour, Veterinary Behaviour and Neurology Holger Andreas Volk, Jasmin Nicole Nessler, Anna Zamansky, Sebastian Meller, Annika Bremhorst, 2025-08-18 The new leap innovation Artificial Intelligence AI will significantly accelerate the speed of science and translate into clinical practice faster than clinicians ever have been used to Machine and deep learning techniques are now readily available to analyze large and complex data sets providing veterinary scientists with a tool to not only better understand complex behaviour traits and neurological conditions but also to delve into the nuances of animal behaviour itself AI can now write plausible sounding text recognize written or spoken human words recognize objects in images or analyze large amounts of data Different fields of applications are known so far such as improving and speeding up interpretation of radiologic findings interpretation of electroencephalography diagnosis of autism in children objectifying ataxia in dogs detecting pain in cats and assessing and characterizing animal behaviours across species At the time of writing more than 500 AI based algorithms have been approved by the FDA for human medicine most of which are used in radiology and neurology In veterinary neurology and animal behavioural science only a limited amount of research on AI has been done so far Most algorithms presented are merely fragments of usable programs and are not suitable for clinical application Therefore ready to use applications are rare yet essential for implementing AI into everyday routine diagnostic work ups scientific research and animal behavioural assessments The research topic will help to unite current efforts and provide a collection of articles to address some of the current scientific and behavioural gaps In the future a clinician might have a clinical decision support tool that generates accurate estimations of likely outcomes of neurological disease and animal behaviour combining anamnestic behavioural clinical pathology and imaging information We are interested in original research systematic reviews and opinion papers not only about the scope and potential of AI for Veterinary Behavior and Neurology but also about the intersection of AI with the study of animal behaviour

ethical considerations and pitfalls that the development of AI generated tools could present Potential themes therefore include but are not limited to AI to recognize monitor diagnose or characterise behaviour neurological deficits or conditions including a detailed analysis of animal behaviour across a variety of contexts and species AI to assess behavioural states in both clinical and natural environments AI to interpret scientific clinical data sets such as clinical pathology omics imaging EEG data and behaviour metrics Ethical and legal considerations when applying or using AI tools in the study of animal behaviour and veterinary medicine Potential of AI to enhance clinical practice in veterinary behavioural medicine veterinary neurology and animal behaviour research Potential of AI enhanced diagnostic and behavioural assessment tools with animals
