Handbook of Research on Adult Learning in Higher Education Okojie, Mabel C.P.O.,Boulder, Tinukwa C.,2020-02-01 In today's globalized world professional fields are continually transforming to keep pace with advancing methods of practice. The theory of adult learning specifically is a subject that has seen new innovations and insights with the advancement of online and blended learning. Examining new principles and characteristics in adult learning is imperative as emerging technologies are rapidly shifting the standards of higher education. The Handbook of Research on Adult Learning in Higher Education is a collection of innovative research on the methods and applications of adult education in residential, online, and blended course delivery formats. This book will focus on the impact that culture, globalization, and emerging technology currently has on adult education. While highlighting topics including andragogical principles, professional development, and artificial intelligence, this book is ideally designed for teachers, program developers, instructional designers, technologists, educational practitioners, deans, researchers, higher education faculty, and students seeking current research on new methodologies in adult education.

A Guide to Disseminating Your DNP Project Marilyn Smith-Stoner,2018-01-28 A Guide to Disseminating Your DNP Project provides an effective, proven blueprint that enables students to disseminate their DNP Projects. This book describes the process of disseminating the final written assignment as is recommended by the American Academy of Colleges of Nursing (AACN) for graduation from a DNP program. For all DNP graduates looking to make a positive impact on health care, today's dissemination of knowledge and research is imperative to initiate quality improvement effectively. By sharing the results of their research, DNP graduates can improve healthcare. This book provides step-by-step instruction for all methods of dissemination, from print to digital media. The text provides step-by-step instructions for each type of dissemination and highlights specific resources and their benefits and drawbacks. It includes explanations of how to use social media, web-based platforms, and alternative artistic means. A Guide to Disseminating Your DNP Project contains a uniquely apt set of resources for the DNP graduate. Key Features: Checklists that illustrate the process of transforming a project to a manuscript or other presentation; User-friendly graphics and diagrams that summarize content; An Appendix with over 50 links to online resources for dissemination; Faculty Guide to help their DNP students through dissemination.

The Organization of the Expert Society Andreas Werr,Staffan Furusten,2016-12-01 It is often claimed that we live in an expert society, a society where more and more individuals take expert roles in increasingly narrow fields. In contrast to more traditional experts, most of these new experts lack generally accepted mechanisms for the certification and legitimation of their expertise. This book focuses on these new as well as established experts and the efforts undertaken to secure and legitimize their expertise. We view these efforts as organizing attempts and study them on four different levels: the society, the market, the organization, and the individual. Based on empirical studies on these four levels of analysis, The Organization of the Expert Society makes the argument that current organizing initiatives in the expert society are based on an objectifying view.

of expertise that risks concealing and downplaying key aspects of expertise Well intended organizing initiatives in the expert society thus run the risk of promoting ignorance rather than securing expertise Focusing on a current general and global phenomenon the rise and organization of an expert society The Organization of the Expert Society will be key reading for scholars academics and policy makers in the management fields of Organizational Theory Management Consulting Organizations Society Critical Management Studies as well as the disciplines of Sociology Political Science and Social Anthropology Instructional Design: Concepts, Methodologies, Tools and Applications Management Association, Information Resources, 2011-03-31 Successful educational programs are often the result of pragmatic design and development methodologies that take into account all aspects of the educational and instructional experience Instructional Design Concepts Methodologies Tools and Applications presents a complete overview of historical perspectives new methods and applications and models in instructional design research and development This three volume work covers all fundamental strategies and theories and encourages continued research in strengthening the consistent design and reliable results of educational programs and models **Expert Resumes for Computer and Web Jobs** Wendy S.
