Since the publication of the Human Genome Project in 2001 and the development of Genome Wide Association Studies GWAS there has been a major shift toward large scale international collaboration in genetic eye disease research Eye researchers involved in genetics have now joined forces with traditional epidemiologists to develop the field of genetic epidemiology Whilst ophthalmic geneticists had focused on rare pathogenic variants mutations with strong effects epidemiologists had focused on common gene variants with small but additive effects see Figure 1 These two areas have now merged identifying a spectrum of genetic variants that are rare intermediate or common with strong medium or mild pathogenicity

Insubstantial speculations from utopian thinking to high risk stock gambles often provoke fierce backlash even when they prove prophetic for the world we come to inhabit Why does this hypothetical way of thinking generate such controversy In this cultural literary and intellectual history Gayle Rogers traces debates over speculation from antiquity to the present Celebrated by Boethius as the height of humanity s mental powers but denigrated as sinful by John Calvin speculation eventually became central to the scientific revolution s new methods of seeing the natural world In the nineteenth century writers such as Jane Austen used the concept to diagnose the marriage market redefining speculation for the purpose of social critique Speculation fueled the development of modern capitalism spurring booms busts and bubbles and recently artificial intelligence has automated the speculation previously done by humans with uncertain and troubling consequences Unraveling these histories and many other disputes Rogers argues that what has always been at stake in arguments over speculation and why it so often appears so threatening is the authority to produce and control knowledge about the future Recasting centuries of contests over the power to anticipate tomorrow this book reveals the crucial role speculation has played in how we create and potentially destroy the future
