How To Make Money With Ai Productivity Tools For American Readers

Filip Drimalka

How To Make Money With Ai Productivity Tools For American Readers:

The Future of No Work Filip Drimalka, 2024-01-01 We have been told for ages that technology would make our lives easier. Instead, we increasingly find ourselves drowning in tedious tasks and feeling trapped in the daily grind, overflowing calendars, endless to-do lists, and a never-ending stream of interruptions. And since we're always connected, our work never seems to end. Imagine a world where technology finally starts taking care of all the boring stuff so you can focus on what really matters to you. Where smart AI apps empower you to create anything you can imagine and even things you never would have thought of. Where you have the power to redesign work around your life, not the other way around. This is the era of No Work. It's not about escaping work but about using our skills and leveraging the possibilities unlocked by AI so that our days are primarily comprised of the things we are passionate about. Because that's how we can create something extraordinary. Inside this book, you'll find hundreds of practical examples and tips: How to find, select, and use the right digital tools for anything you do. How to make your productivity skyrocket with AI and reclaim your time. How to do things your way with greater freedom by automating more tasks. How to craft the work you want, whether you're an entrepreneur or an employee. How to seize new opportunities and build a future-proof career. The book will provide you with loads of tips on the best apps and tools that are part of the AI revolution, but the real magic is how it changes the way you think. You'll learn new skills and timeless principles that will keep you ahead of the game, no matter how AI changes the way we work. **FILIP DRIMALKA** pronounced like Phil Dream is a digital innovation expert and a sought-after European consultant on technology adoption. He is the founder of Digiskills, Digitask, and Digi Challenge projects that are helping hundreds of companies and tens of thousands of individuals upskill and thrive in the digital age. Filip resides in the Central European hot spot Brno with his wife and two children. When he's not driving digital transformation, you can find him skiing, surfing, or mountain biking. He doesn't just write about No Work; he actually lives it. [Artificial Intelligence and Work](#) John Bratton, Laura Steele, 2024-12-04 In an era marked by insecurity from neoliberalism, financial volatility, political instability, regional conflicts, pandemics, and the climate crisis, Artificial Intelligence (AI) is revolutionizing our work, organizations, societies, and the environment. This critical text explores who truly benefits from AI's development and deployment, offering a comprehensive overview of AI's nature, history, and applications. It delves into crucial themes such as the future of work, digitalization, neoliberalism's impact, power dynamics, ethics, inequality, gender, race, intersectional discrimination, and environmental sustainability. Unlike practical machine learning guides, this book examines how AI and AI-based technologies are transforming work, highlighting both benefits and potential harms. Combining critical management and leadership studies with organizational sociology, it addresses societal implications, inequality, ethics, and power, often overlooked by other textbooks. John Bratton's lucid and engaging writing style brings a cutting-edge subject to life, blending breadth, critical analysis, and academic rigor. Contemporary examples illustrate AI's real-life implications for organizations and work today, while thought-provoking

questions encourage readers to engage with and reflect on the topics throughout Authored by John Bratton an Honorary Professor at Queen s University Belfast and Laura Steele a Senior Lecturer in Business and Society at Queen s University Belfast this interdisciplinary text is essential for students studying contemporary and emerging issues in business and management including AI business analytics digitalization and the future of work It is also recommended for courses on the sociology of work ethics organization studies management leadership and HRM This book is poised to become an essential textbook for courses on AI digitalization and the future of work making it a valuable resource for students and educators alike
