Teach About Cutting School Budgets Karen D. Olsen,2010-02-18 Karen Olsen has put budget topics into perspective so that school administrators can make decisions based on what is best for children not what is easiest and most efficient for adults This book is a powerful guide in helping our principals see through the fog of mandates policies and red tape and get to the priority of students Terri Patterson Director of Elementary Education Waco Independent School District TX This book boldly asserts that brain research should be applied wherever human brains are working Not only can and should brain research inform how and what we teach in the classroom it should be brought to bear in boardrooms and the school budgeting process as well Linda Jordan Associate Professor Hope College Make objective budget cutting decisions that will truly impact student achievement In tough economic environments budget cutting is a daunting but necessary task for many school administrators Karen D Olsen takes an exciting unique approach by applying brain research to budgeting Now educators can make the decision making process more objective by using analytical thinking in school budgeting rather than responding to emotion tradition or outside influences Providing a strategy builder chart this book Offers action items for putting the strategies into practice Helps leaders determine where money should be reinvested or reallocated Provides specific tips for working within a group decision making setting Includes more than 30 analytical charts to aid in gathering needed information What Brain Research Can Teach About Cutting School Budgets offers principals and district leaders a methodical process for taking subjectivity out of the budgeting process Students' and Teachers' Values, Attitudes, Feelings and

Beliefs in Mathematics Classrooms Hanna Palmér,Jeppe Skott,2017-12-04 This contributed volume is an exciting product of the 22nd MAVI conference which presents cutting edge research on affective issues in teaching and learning math The teaching and learning of mathematics is highly dependent on students and teachers values attitudes feelings beliefs and motivations towards mathematics and mathematics education These peer reviewed contributions provide critical insights through their theoretically and methodologically diverse analyses of relevant issues related to affective factors in teaching and learning math and offer new tools and strategies by which to evaluate affective factors in students and teachers mathematical activities in the classroom Among the topics discussed The relationship between proxies for learning and

mathematically related beliefs Teaching for entrepreneurial and mathematical competences Prospective teachers conceptions of the concepts mean median and mode Prospective teachers approach to reasoning and proof The impact of assessment on students experiences of mathematics Through its thematic connections to teacher education professional development assessment entrepreneurial competences and reasoning and proof Students and Teachers Values Attitudes Feelings and Beliefs in Mathematics Classrooms proves to be a valuable resource for educators practitioners and students for applications at primary secondary and university levels *International Journal of Electrical Engineering Education* ,1994
