Artificial Intelligence for Education Mario Allegra, Manuel Gentile, Giuseppe Città, Frank Dignum, Iza Marfisi-Schottman, 2023-11-27 What learning teaching and education will be in the next future is an open question Nevertheless believing that an increasing prevalence of AI may not influence the education field seems objectively unlikely In recent years the new renaissance of AI has stimulated discussion on how advances in AI can influence the educational sector and the future educational policies and the impact of AI on Technology Enhanced Learning TEL On the other side the attention of the education sector in artificial intelligence is complemented by the consideration that since the early days of AI researchers have shown for the education sector which has often seen education as one of the preferred application areas The interaction between the AI and TEL research fields led to the investigation of how the advance in AI could support the development of flexible inclusive personalized engaging and effective learning tools Besides research in this area could be a powerful tool to open the learning black box by providing a deeper understanding of how learning occurs

The proposed Research Topic aims to gather contributions that provide a comprehensive picture of how AI is changing educational practices and how the key stakeholders in the educational community i.e. students, teachers, faculty, and families perceive this ongoing change. Relevant topics include but are not limited to AI applications in real world educational settings: Intelligent Tutoring Systems, Adaptive learning environments, Learning design, and AI Students profiling, definition of the student model, and ethical implications. Intelligent techniques for objective and integrated students' evaluation in TEL. Teachers' competencies for effective integration of AI into Education. Teachers' perceptions of AI, prejudices, and attitudes. The role of cognitive architectures in Education. Serious games and AI. Social robotics in Education.
