Stephens, 2023-02-21 Being smart about business means knowing what to expect. That means thinking ahead and preparing for the inevitable changes that will affect the way business is done. This allows businesses to be resilient and thrive in a changing environment. Digital marketing is no different. In fact, author Josh Kaufman discusses the value of comparison in his book *The Personal MBA*. It means imagining possible futures and then preparing for them. Let's say you have a large company that does well in a certain niche. Maybe you own a business that sells whey protein shakes. The mistake some big companies make is thinking they are too big to fail and sticking with it. But what if another company comes along and makes a better protein shake for less money? What if a new protein source is discovered? What if a study showed whey protein was bad for us? All of these things can happen and can seriously disrupt even the most established business. However, smart companies are already considering and preparing for these possibilities. It's a comparative simulation: you think about what's going to happen and then prepare for that eventuality. As a digital marketer, this means thinking about things that might change the face of marketing. And the one thing that probably had the biggest impact of all, AI and machine learning, have the potential to completely change the face of internet marketing and even make many old strategies obsolete. Only by preparing for these changes can you ensure that your website can maintain its position in the SERPs, your ad campaigns remain profitable, and your services remain relevant. And a lot of this stuff isn't just speculation; it's happening right now. AI is already making waves, though you may not have noticed it yet. This affects how SEO works, the tools and software we use, and how ads are displayed. AI is capable of thinking faster and smarter than any human, and this is especially true for data-driven internet marketing. AI marketers can earn an unlimited amount of content per second, doing the work of hundreds of people. All of this content is perfectly adapted to the target group. AI will rule Google. This will advance the entire business model. AdWords will start, and it will play new instruments that we never even dreamed of. The uniqueness of digital marketing is just around the corner. This book will help you prepare and explain a number of concepts: AI vs machine learning, How to do SEO now that Google is the first AI company, Chatbots, Programmatic advertising, Great information, RankBrain, Digital assistant, Data Science, SQL, Hidden semantic indexing, The Future of Internet Marketing. This book will give you a crystal ball to look into the future of internet marketing and make sure you are prepared for all of these changes as they come. You end up being more prepared and in a better position than the other 99.9% of traders. **Ultimate Affiliate Marketing with Blogging Quick Start**

Starting Out Online Creating your own products to sell online isn't an easy task. You have to first find out what would sell by doing tedious research. You have to create the product. You have to deal with payment processors and shopping carts. You have to deal with customer support. You have to provide ongoing maintenance such as web hosting and technical issues. The solution to all this is Affiliate Marketing. When you are an affiliate marketer you promote a product service or site for a business and you as a publisher get rewarded for doing so. In most cases you find products related to your niche and offer them on your website or blog. You promote the products and post a link on your site where they can purchase the products. Then when someone follows that link to buy something you earn a commission. The commissions can be either a percentage of the sale or a fixed amount. You've seen links to other sites when you've read other people's blogs. These links make the blogger money. Here's what you'll discover in the Simple Affiliate Success guide.
