Systems and Agents *Communication and Intelligent Systems* Harish Sharma,Vivek Shrivastava,Kusum Kumari Bharti,Lipo Wang,2022-08-18 This book gathers selected research papers presented at the Third International Conference on Communication and Intelligent Systems ICCIS 2021 organized by National institute of Technology Delhi India during December 18 19 2021 This book presents a collection of state of the art research work involving cutting edge technologies for communication and intelligent systems Over the past few years advances in artificial intelligence and machine learning have sparked new research efforts around the globe which explore novel ways of developing intelligent systems and smart communication technologies The book presents single and multi disciplinary research on these themes in order to make the latest results available in a single readily accessible source Unlocking the Power of AI Myra Roldan,2024-01-01 Artificial intelligence adoption is accelerating across industries but many learning teams may not be moving the needle fast enough Now is the prime opportunity for learning teams to prioritize its usage However although some L D professionals have experimented with generative AI tools few know what the game changing technology really is In this issue of TD at Work Myra Roldan shares A simplified explanation of how AI works The difference between traditional AI and generative AI Sample use cases for L D professionals to think about A brief overview of how to get started using AI Some notes on privacy and ethics The Tools Resources in this issue are an Artificial Intelligence Tool Evaluation Worksheet and an Artificial Intelligence Project Planning Checklist *Confronting Digital Dilemmas in Translator and Interpreter Training* Pavol Šveda,Martin Djovčoš,Emília Perez,2025-10-30 This collection explores the challenges and opportunities brought on by developments in emergent technologies for translator and interpreter training Given the growing role of language professionals as mediators in an increasingly fragmented and globalized world this book offers an in depth look at the present and future of translator and interpreter training amidst these changes Featuring perspectives from established and up and coming scholars the volume is organized in three sections taking in turn different dimensions of the current training landscape These parts consider key topics including theoretical foundations and pedagogical innovations ethical considerations and social responsibility and ways forward for adapting training programs to better grapple with new tools Taken as a whole this book will be a useful resource for students and scholars in translation and interpreting studies as well as practicing professionals

Surveillance Education Nolan Higdon,Allison Butler,2024-08-02 Surveillance Education explores the pervasive use of digital surveillance technologies in schools and assesses its pernicious effects on students Recognizing that the use of digital technologies will persist the authors instead offer practical ways to ameliorate their impact In our era of surveillance capitalism digital media technologies are ever more intertwined into the educational process Schools are presented with digital technologies as tools of convenience for gathering and grading student work as tools of support to foster a more equitable learning environment and as tools of safety for predicting or preventing violence or monitoring mental emotional and physical health Despite a dearth of evidence to confirm their effectiveness digital data collection and tracking is often

presented as a way to improve educational outcomes and safety This book challenges these fallacious assumptions and argues that the use of digital media technologies has caused great harm to students by subjecting them to oppressive levels of surveillance impinging upon their right to privacy and harvesting their personal data on behalf of Big Tech In doing so the authors draw upon interviews from K 12 and higher education students teachers and staff civil rights and technology lawyers and educational technological programmers The authors also provide practical guidance for teachers administrators students and their families seeking to identify and combat surveillance in education This urgent eye opening book will be of interest to students and educators with interests in critical media literacy and pedagogy and the sociology of technology and education
