Marketing Strategies to Generative AI examines how communication strategies and marketing techniques are adapting to the demands of GAI. It explores transformative trends in communication and marketing focusing on GAI sustainability and evolving consumer behaviors. This book covers topics such as blockchain ethics and law and neuromarketing and is a useful resource for business owners, marketers, computer engineers, academicians, researchers, and scientists. [At the Edge of AI](#) Libuše Hannah Veprek, 2024-08-02. How are human computation systems developed in the field of citizen science to achieve what neither humans nor computers can do alone? Through multiple perspectives and methods, Libuše Hannah Veprek examines the imagination of these assemblages, their creation, and everyday negotiation in the interplay of various actors and play science entanglements at the edge of AI. Focusing on their human technology relations, this ethnographic study shows how these formations are marked by intraversions as they change with technological advancements and the actors' goals, motivations, and practices. This work contributes to the constructive and critical ethnographic engagement with human AI assemblages in the making.

Uses and Risks of Business Chatbots Tania Peitzker, 2020-03-24. In this easy-to-read book, Tania Peitzker cites leading business intelligence and analyst firms' research and takes a deeper dive into the practical challenges of chatbots, including the obstacles and triumphs experienced. This world-first summary of the evolution of 2D chatbots in websites, backends of portals, social media apps, and conversationally advanced 3D mixed reality cognitive interfaces serves several purposes. This book dissects some of the best-known case studies to emerge from the past two decades of tech giants launching the best chatbot or supposedly the smartest intelligent virtual assistant. From Microsoft's Tay AI to London's Eugene Goostman claim to Turing test fame from the market-dominating Amazon Alexa to Gatebox's IoT innovation with its multi-cloned Japanese hologram girlfriend, this is the first-ever history of bots. This book also touches on the Trump vs. Clinton chatbot wars, as well as the UK Labour Party's dating site stunt, including references made to Facebook Messenger bots and the impact of the Cambridge Analytica scandal. Included in the book is a hands-on checklist and guidelines for people wanting to buy or license bots for their companies and organizations. The author also outlines the possible use cases and key issues to consider when sourcing and commissioning your first botification project, with the final chapters predicting where the future development and development traps might lie.

Wroblewski, 2023-07-10 To grow your ecommerce business you need to gain more clients And to achieve it you have to

provide high quality customer experience Sounds logical But the more visitors on your website the more questions your support agents have to handle And here is the challenge you need to face to successfully grow your store How to serve more clients answer more questions and maintain the highquality of support at the same time There are two ways The first is to constantly hire new support agents It probably will work but the cost you ll have to take for constantly recruiting and training new employees will be huge The second way is connected to technology that took the ecommerce industry and not only this one by a storm and will stay with us for a long time If not forever The AI

AI Chatbots in Customer Service Evgeny Kagan, Maqbool Dada, Brett Hathaway, 2022 Despite recent advances in language processing algorithms chatbot technology continues to face adoption hurdles We survey chatbot users about their experiences and use their testimonies to construct a decision model of customer choice between the chatbot service channel and the live agent service channel The fundamentals of this choice are the time spent in line and in service the chatbot s success rate and the qualitative differences in the service experience provided by the chatbot and by the live agent We then conduct experiments in which participants choose and then experience the chatbot or the live agent channel as we vary operational i e times spent and chatbot success rates and qualitative features of the chatbot We find that users respond positively to improvements in chatbot operational performance however the chatbot channel remains underutilized relative to what expected time minimization would predict Additional experiments show that this underutilization is caused by two separate mechanisms algorithm aversion aversion to an algorithmic service provider and gatekeeper aversion aversion to any service format that may involve multiple stages Examining potential remedies we find that algorithm aversion can be mitigated by making salient the expected time savings offered by the chatbot However gatekeeper aversion is more persistent and harder to overcome We conclude by building and estimating a structural model of channel demand and by proposing a behavior aware service design that reduces the firm s staffing costs by up to 22%
