Virtual Victorians Veronica Alfano, Andrew Stauffer, 2016-01-18 Exploring how scholars use digital resources to reconstruct the 19th century this volume probes key issues in the intersection of digital humanities and history Part I examines the potential of online research tools for literary scholarship while Part II outlines a prehistory of digital virtuality by exploring specific Victorian cultural forms

A Sleepwalker's Guide to Social Media Tony D. Sampson, 2020-07-09 Positing online users as sleepwalkers Tony Sampson offers an original and compelling approach for understanding how social media platforms produce subjectivities Drawing on a wide range of theorists including A N Whitehead and Gabriel Tarde he provides tools to track his sleepwalker through the dark refrain of social media a refrain that spreads through viral platform architectures with a staccato like repetition of shock events rumours conspiracy misinformation big lies search engine weaponization data voids populist strongmen immune system failures and far right hate speech Sampson s sleepwalker is not a pre programmed smartphone junkie but a conceptual personae intended to dodge capture by data doubles and lookalikes Sleepwalkers are neither asleep nor wide awake they are a liminal experimentation in collective mimicry and self other relationality Their purpose is to stir up a new kind of community that emerges from the potentialities of revolutionary contagion At a time in which social media is influencing more people than ever *A Sleepwalker s Guide to Social Media* is an

important reference for students and scholars of media theory digital media and social media *Guide to Diversity, Equity, and Inclusion in the Music Industry* Andrae Lamont Alexander, 2025-10-27 This book is a guide to diversity equity and inclusion in the American music industry from the perspectives of different segments of society African American Hispanic Latino Indigenous Women Asian LGBTQ Mental Illness Disorder and Physically Disabled Different Socioeconomic Status and Religion With the music industry's entrepreneurial activities being that of cultural monetization analysis of the work of Laura Mulvey and her concept of the Male Gaze specifically the heterosexual white male suggests that the societal lens used to view all segments of society are in the hands of a group that does not understand the historical nuances that shape the culture and current actions of each group represented and the current lived experiences of each segment in society whose culture is monetized This showcases a gap in understanding that presents an opportunity for deep cultural appreciation once the individual perspectives of each group are added to the collective mind This volume will be unique in that it will provide an overview of each group's history in America their current societal and music industry state and possible solutions with care taken to give voice to scholars from each community An example of the need for this work comes from the African American community where rappers have been consistently jailed for rap lyrics since the 1980s based on the assumption that rap was started by gang members This shows the power of untrue societal assumptions in affecting laws that negatively affect a group even though they are based on untruths that are perpetuated by executives focusing mainly on the bottom line of their company control of culture and social learning through media Showing a lack of artistic autonomy artists who sign with major labels often protest the content they are asked to create and release but must comply or remain in predatory contracts Outside of sociology and media studies which give broad overviews of each segment there is no book that presents readers with historical documentation a view of each group from multiple vantage points internal and external and how their history and social perceptions intersect in the music industry system to create crystalized pieces of culture that are filtered through the lens of Capitalism **An ICT agripreneurship guide** CTA, 2017-08-01 This Handbook provides a step by step roadmap designed to equip aspiring ICT entrepreneurs with the information and knowledge they need to start an ICT based business in the agricultural sector outlining key opportunities and challenges that will be encountered along the way Using real life examples it provides strategies and pathways for averting common mistakes faced by early stage entrepreneurs Topics covered include agricultural value chains and their stakeholders ICT business challenges effective business plans and models for designing funding and scaling ventures *Reputation in Business* Stuart Thomson, 2022-09-28 A compelling mix of reputation management crisis leadership and the role of politics in business this book provides unique practical steps that leaders can take to protect their reputations and those of the organisations they head in an ever more open social media led world Although leaders increasingly recognise the vital intangible asset that reputation represents too many do not really understand what reputation is and the steps that should be taken to build it and their corporate value Given the range of
