Mills,2021-11-02 The conventional wisdom on how technology will change the future is wrong Mark Mills lays out a radically different and optimistic vision for what s really coming The mainstream forecasts fall into three camps One considers today as the new normal where ordering a ride or food on a smartphone or trading in bitcoins is as good as it s going to get Another foresees a dystopian era of widespread digitally driven job and business destruction A third believes that the only technological revolution that matters will be found with renewable energy and electric cars But according to Mills a convergence of technologies will instead drive an economic boom over the coming decade one that historians will characterize as the Roaring 2020s It will come not from any single big invention but from the confluence of radical advances in three primary technology domains microprocessors materials and machines Microprocessors are increasingly embedded in everything Materials from which everything is built are emerging with novel almost magical capabilities And machines which make and move all manner of stuff are undergoing a complementary transformation Accelerating and enabling all of this is the Cloud history s biggest infrastructure which is itself based on the building blocks of next generation microprocessors and artificial intelligence We ve seen this pattern before The technological revolution that drove the great economic expansion of the twentieth century can be traced to a similar confluence one that was first visible in the 1920s a new information infrastructure telephony new machines cars and power plants and new materials plastics and pharmaceuticals Single inventions don t drive great long cycle booms It always takes convergent revolutions in technology s three core spheres information materials and machines Over history that s only happened a few times We have wrung much magic from the technologies that fueled the last long boom But the great convergence now underway will ignite the 2020s And this time unlike any previous historical epoch we have the Cloud amplifying everything The next long boom starts now Genealogy Bulletin ,1991 **The Churchman** ,1878 **The United States Army and Navy Journal and Gazette of the Regular and Volunteer Forces** ,1896 **T.P.'s Weekly** ,1928 **The Beacon** ,1885 **Current Index to Journals in Education** ,1998-07 *St. Andrew's Cross* ,1916 **Public Opinion** ,1870 **National Fisherman** ,1986-05 **The Christian Leader** ,1933 The Universalist Leader ,1933 **The Country Gentleman** ,1950 Contractors and Engineers Magazine ,1969 **British Books** ,1960
