technological challenges such as slow Wi Fi camera malfunctions or other pragmatic concerns Finally this book makes a case that the success of these projects with Pacific Islander and Asian American students suggests that although devising comes from a White Eurocentric tradition it can provide an effective learning strategy for students from a wide variety of backgrounds As global discourse continues to push toward reform that would allow populations around the world increased agency over their lives this volume makes a unique contribution to the critical conversation around student agency in education today and will appeal to scholars and researchers across arts education and theatre and performance studies
