Employee Well-being and Health Rolf Van Dick, Anja Baethge, Nina M. Junker, 2024-12-31 The rapidly growing field of organizational psychology has over the last few years become one of the fastest growing branches of psychology. Particularly taking care of the health and well-being of employees in the workplace cannot only be considered a moral imperative but has begun globally to be recognised as driving forces of socio-economic growth. Employee health and well-being is crucial to organizations in regards to improved productivity, employee performance, job satisfaction, staff retention, reduced absenteeism, increased job satisfaction, and work commitment. Thus, research relating to employee well-being and health has produced some significant results and furthered our understanding of this subsection of the organizational psychology field. The evolution of the way we work has also gained traction in the organizational psychology field in relation to remote working. Since the Covid-19 pandemic, many workforces have adapted more or less permanently to this form of working. Frontiers has organized a series of Research Topics to highlight the latest advancements in research across the field of organizational psychology and the implications of remote working. This editorial initiative of particular relevance led by Professor Rolf van Dick, Specialty Chief Editor of the Employee Well-being and Health section, alongside Dr. Anja Baethge and Dr. Nina Junker, is focused on the implications of remote working on employee well-being and health. **New Idea Woman's Magazine**, 1907
