Fábricas de Software: Experiencias, Tecnologías y Organización. 2ª Ed. Mario G. Piattini Velthuis, 2012-03-28 La fabricación de software es uno de los sectores de mayor crecimiento en los últimos años y representa cada vez más una de las principales actividades económicas tanto en los países desarrollados como para los países en vías de desarrollo. Y es que en efecto el software se halla presente en la actualidad en la mayor parte de los sistemas que resultan vitales para el funcionamiento y progreso de las sociedades modernas. El concepto de fábrica de software cumple ya más de cuarenta años desde que en 1968 Bemer lo mencionara por primera vez y afirmara que parece que tenemos pocos entornos específicos instalaciones de fábrica para la producción económica de programas. Un año después se creó la primera fábrica de software Hitachi Software Works. Desde entonces el término fábrica de software denota llevar a cabo el desarrollo y mantenimiento de software de forma comparable a la producción de otros productos industriales, eso sí salvando las peculiaridades del propio software. A pesar de ello industrializar la fabricación de software ha demostrado que sirve para reducir los costes y el ciclo de vida de los productos mejorando la calidad del software. En la última década se han publicado diversos estudios y estándares en los que se exponen los principios que se deben seguir para la fabricación de software como modelos de mejora CMMI SPICE desarrollo dirigido por modelos MDA líneas de producto SPL servicios Web el desarrollo global de software etc que complementan otras cuestiones más conocidas pero por ello no menos importantes en el desarrollo de software como la gestión de requisitos las pruebas la gestión de la configuración etc. Todo ello además debe venir complementado por aspectos organizativos y de gestión que resultan clave para el éxito de la fabricación de software. La presente obra reúne las contribuciones de los mayores especialistas en aspectos relacionados con la fabricación de software por lo que se ofrece una visión amplia sobre diferentes factores que se deben tener en consideración para la puesta en marcha y la gestión de una fábrica de software. Además incluye la experiencia práctica de 13 fábricas de software grandes y pequeñas de España Argentina México y Venezuela. Frente a la primera edición en esta segunda se han revisado y modificado todos los capítulos de acuerdo a los cambios que se han producido a lo largo de los últimos años en la evolutiva Industria del Software. Además se ha contado con la colaboración de nuevas empresas en el apartado de experiencias y la aportación del Instituto Nacional de Tecnologías de la Información INTECO con su visión sobre las factorías de software en España. El libro va dirigido a directores generales CEO Chief Executive Officers de organizaciones directores de informática CIO Chief Information Officers y directores de desarrollo de sistemas de información de las mismas personal informático en general jefes de proyecto analistas consultores etc que están trabajando en el área de desarrollo y mantenimiento de software así como responsables de
