Kates, Jesse H. Ausubel, Mimi Berberian, 1985-09-24 A far reaching collection of essays that assess recent climate shifts and the possibilities of human induced climate alterations such as a long term global warming derived from the enrichment of the atmospheric content of the greenhouse gases International experts cover climatic variability and change identifying climate sensitivity the biophysical impacts of agriculture fisheries pastoralism water resources and energy resources and social and economic impacts and adjustments      *Impacts of a Warming Arctic - Arctic Climate Impact Assessment* Susan Hassol, Arctic Climate Impact Assessment, 2004-12-13 Plain language synthesis of key findings of Arctic Climate Impact Assessment for policymakers and broader public      *Environmental Assessment as a Tool for Climate Change Mitigation* Benoit Mayer, 2024-11-15 Most governments have established procedures to appraise the environmental impacts of proposed activities The focus of these environmental assessment procedures has long been on local environmental issues such as air water and land pollution which have a direct and concrete effect on communities In recent years however these procedures have increasingly been used to consider how activities could result in the emission of greenhouse gases and exacerbate climate change Environmental Assessment as a Tool for Climate Change Mitigation builds on a broad survey of over one hundred national environmental assessment practices legislation guiding documents cases and administrative practice to reflect on the main conceptual and practical issues facing climate assessment By presenting and discussing jurisdictional developments and national debates in a global comparative perspective this book aims to enrich our collective understanding of the modalities of and ultimately the mitigation opportunities arising from the use of climate assessment in relation to proposed activities The author concludes this timely and forward looking volume by identifying good practices that lawmakers regulators national agencies judges and lawyers should consider when developing and applying the law on climate assessment      *Environmental and Social Impact Assessment* Frank Vanclay, Daniel A. Bronstein, 1995-12-05 Reporting on recent developments in the field of impact assessment this volume critically analyzes such key areas of assessment as technology demography economy risk ecology health development and climate Each area is related back to impact assessment as an overall process      **Towards an Integrated Impact Assessment of Climate Change: The MINK Study** Norman J. Rosenberg, 2012-12-06 General circulation models state that the central United States and other mid

latitude continental regions will become warmer and drier as the result of greenhouse warming On this premise the dustbowl period of the 1930s was selected as an analogue of climate change and its weather records imposed on the Missouri Iowa Kansas region to assess how current agriculture forestry water resources and energy and the entire regional economy would be affected The same climate was also imposed on a MINK region forty years into the future by which time climate change may actually be felt to assess whether technological and societal change would alter the region s vulnerability to climate change Another premise of the study was that people would not suffer the impacts of climate change passively but would use available tools to ease the stress The rising atmospheric concentration of carbon dioxide expected to be the major cause of greenhouse warming also works to improve plant growth and reduce plant water use So the effects of this CO<sub>2</sub> fertilization were also considered in the analysis The results some of them surprising of this first fully integrated analysis of climate change impacts and responses are reported in this book Environmental Impact Assessment Charles H.
