Cultures of Prediction in Atmospheric and Climate Science Matthias Heymann, Gabriele Gramelsberger, Martin Mahony, 2017-06-26 In recent decades science has experienced a revolutionary shift The development and extensive application of computer modelling and simulation has transformed the knowledge making practices of scientific fields as diverse as astro physics genetics robotics and demography This epistemic

transformation has brought with it a simultaneous heightening of political relevance and a renewal of international policy agendas raising crucial questions about the nature and application of simulation knowledges throughout public policy Through a diverse range of case studies spanning over a century of theoretical and practical developments in the atmospheric and environmental sciences this book argues that computer modelling and simulation have substantially changed scientific and cultural practices and shaped the emergence of novel cultures of prediction Making an innovative interdisciplinary contribution to understanding the impact of computer modelling on research practice institutional configurations and broader cultures this volume will be essential reading for anyone interested in the past present and future of climate change and the environmental sciences

Bridging Science And Policy Implication For Managing Climate Extremes Hong-sang Jung,Bin Wang,2017-12-19 Since 1980 the number of climate related disasters has been greatly increased globally Scientific consensus based on the IPCC fifth report suggested that global warming would bring more intense and frequent extreme climate events These climate related disasters hinder the achievement of sustainable economic growth and prosperity by disrupting supply chains impeding production destroying infrastructure and necessitating high cost rebuilding and recovery To mitigate the climate extreme risks and possible losses it is essential to maximize the utilization of scientific outputs and to share best practices in disaster risk management Aligned with such purposes Asia Pacific Economic Cooperation APEC Climate Center APCC hosts the APEC Climate Symposium APCS every year APCS focused on drought prediction and management in 2013 climate extremes and hydrological disaster in 2014 and efficient use of climate information for disaster risk management in 2015 This book aims to compile some of the important results from the latest research in climate extreme prediction and services and its application studies with a focus on climate extremes such as typhoons droughts and floods based on the APCS presentations during 2013 2015

Science Fiction and the Historical Novel Ian P. MacDonald,Kate Polak,2024-09-16 If you woke to realize that you could rewrite your yesterday without knowing the kind of tomorrow it would grant you would you do it Are the authors of our destiny working with an outline or spit balling confusing plotlines Since the past changes possible futures to what alighting butterfly should we pay the most heed This book explores the liminal space between speculative fiction and the historical novel Staged as a transnational multicultural conversation it takes up a call originally made by Fredric Jameson in Archaeologies of the Future wherein he describes that flashpoint between speculative and historical genres as the symptom of a mutation in our relationship to historical time itself Drawing together postcolonial feminist cultural Indigenous and cognitive approaches Science Fiction and the Historical Novel asks what the past can offer a future oriented world and how the future can be imagined in relation to a past that seeks narratives of inevitability rather than possibility Engaged with the idea of the past as a model for the future authors in this volume probe the extent to which
