**Chichen Itza** Josie Hertz, In the heart of Mexico's Yucatan Peninsula where limestone plains stretch endlessly beneath a tropical sky lies one of the ancient world's most extraordinary archaeological sites. Chichen Itza, whose name translates to 'At the mouth of the well of the Itza', stands as a testament to the remarkable achievements of Maya civilization and represents one of humanity's greatest architectural and astronomical accomplishments. This sacred city, which flourished for over a millennium, emerged from humble beginnings around 600 CE to become the most powerful and influential center in the northern Maya lowlands, attracting pilgrims, traders, and scholars from across Mesoamerica. The origins of Chichen Itza can be traced to the broader context of Maya civilization, which had been developing sophisticated urban centers, writing systems, and astronomical knowledge for over a thousand years before the first stones were laid at this site. The Maya had already established magnificent cities like Tikal, Palenque, and Copán in the southern lowlands, creating a complex network of city states that engaged in trade, warfare, and cultural exchange across vast distances. However, by the late Classic period, many of these southern centers were experiencing decline, setting the stage for the rise of new powers in the northern Yucatan. The choice of location for Chichen Itza was influenced by several crucial factors that would shape the city's development and success. The site sits atop a vast network of underground rivers and cenotes (natural sinkholes) that provided access to freshwater in a region where surface water is scarce. These cenotes were not merely practical water sources but held profound religious significance for the Maya, who believed them to be gateways to the underworld and dwelling places of the rain god Chaac. The Sacred Cenote at Chichen Itza would become one of the most important pilgrimage destinations in the Maya world, drawing visitors from hundreds of miles away who came to make offerings and seek divine favor.

Chichen Itza was a powerful religious political scientific and artistic center of the Maya people Readers will learn about how Chichen Itza began and what happened to cause the downfall of a great society The book also provides details about the culture of the Maya of Chichen Itza and the stunning architecture they built like the El Castillo pyramid the Temple of the Warriors and the massive ball court that was used for games and rituals **Chichen Itza** Miguel Angel Vergara,199?

The Most Famous Cities of the Maya Charles River Charles River Editors,Jesse Harasta,2018-02-20 Includes pictures Describes the history and archaeology at each site Includes a bibliography for further reading Many ancient civilizations have influenced and inspired people in the 21st century like the Greeks and the Romans but of all the world s civilizations none have intrigued people more than the Mayans whose culture astronomy language and mysterious disappearance all continue to captivate people At the heart of the fascination is the most visited and the most spectacular of Late Classic Maya cities Chich n Itz Chich n Itz was inhabited for hundreds of years and was a very influential center in the later years of Maya civilization At its height Chich n Itz may have had over 30 000 inhabitants and with a spectacular pyramid enormous ball court observatory and several temples the builders of this city exceeded even those at Uxmal in developing the use of columns and exterior relief decoration Of particular interest at Chich n Itz is the sacred cenote a sinkhole was a focus for Maya rituals around water Because adequate supplies of water which rarely collected on the surface of the limestone based Yucatan were essential for adequate agricultural production the Maya here considered it of primary importance Underwater archaeology carried out in the cenote at Chich n Itz revealed that offerings to the Maya rain deity Chaac which may have included people were tossed into the sinkhole Early Mayap n was closely connected to the overshadowing power of the region at the time the mighty trading city of Chich n Itz Mayap n emerged first as a minor settlement in the orbit of Chich n but it slowly came to replace it after the larger city s trade connections with the Toltecs of Tula crumbled and it suffered a staggering defeat by Mayap n s armies The building styles and art in their city show both admiring references to the great Chich n Itz as well as an attempt to position Mayap n as a more orthodox heir of Maya tradition At the same time they emulated many features and could not escape the tremendous influences especially in religion of Chich n This is seen in the fact that many of the most important buildings in the new city appear to be small scale reproductions of ones in Chich n The Maya maintained power in the Yucatan for over a thousand years and at the height of its Classical era 3rd 9th centuries CE the city of Tikal was one of the power centers of the empire Archaeologists believe Tikal had been built as early as the 5th or 4th century BC and eventually it became a political economic and military capital that was an important part of a far flung network across Mesoamerica despite the fact it was seemingly conquered by Teotihuacan in the 4th century CE It seems the foreign rulers came to assimilate Mayan culture thus ensuring Tikal would continue to be a power base and as a result the city would not be abandoned until about the 10th century CE During the Maya s Classical era the city of Uxmal was one of its most noteworthy places While it was not as powerful as cities like Tikal Uxmal was apparently at the forefront of Mayan

culture particularly when it came to architecture. However, while Uxmal used high ground to display its prominence and the ruins are still among the most popular places for tourists in the region, the site is still shrouded in mystery. Even as scholars continue to work on the site to further interpret it, it's still unclear when exactly Uxmal was founded, how many people called it home, and when it was abandoned, despite the existence of Mayan chronicles and oral legends. What is apparent, however, is the skills of Uxmal's artisans, whether through constructing structures like the five-level Pyramid of Magicians and the expansive Governor's Palace or adorning the structures with precisely detailed art and sculptures. In fact, the craftsmanship can be credited with helping to preserve Uxmal itself. *Mystery of the Maya* R. A. Montgomery, 1987. The reader faces deadly dangers as a writer on assignment in Mexico to explore the ruins of the Mayan Indians and solve the mystery of why the ancient civilization collapsed. *The Temple of the Warriors* Earl Halstead Morris, 1931. Inside the Mayan Ruins at Chichen Itza By: Dean C, 2012-01-09. The famous Mayan pyramids of Chich'n Itz are over 1500 years old and are located only 75 miles from Mérida. The name Chich'n Itz is a Mayan word CHI mouth CHEN well and ITZA of the Itza tribe. Some believe people were occasionally thrown into the nearby cenote as sacrifices and those who survived were believed to be seers.

Lost Pyramids of Mesoamerica Rhandel Lopez, While most visitors to Mexico visit one of the great Mayan cities, it is worth visiting some of the lesser-known ruins like Mayapan and Balamku. Mayapan is an ancient Maya city in the northern Yucatan Peninsula of Mexico. The site has a long history with its first occupation dating back to at least 900 BC and its last occupation dating to around 1450 AD. The word Mayapan means Hill of the Jaguar. The name refers to the shape of one of three hills that formed it; this hill was called Pa Chan, Place of the Jaguar. It was here that a jaguar deity named Chac reigned. When Chac left his post as a god of rain, the rain ceased falling on earth for four years until he returned. During this time, people were forced to irrigate their crops by hand or die from thirst if they failed at growing corn without rainwater overflow from nearby lakes and rivers. The city of Teotihuacan is one of the most important archaeological sites in Mexico. It was the center of a civilization at its peak around the 1st century BC and was abandoned around 650 AD, leaving behind an impressive collection of pyramids and other structures. As you explore this site, you will discover how these ancient people lived and what they left behind for us to admire today. Tulum is a small town on the coast of the Yucatan Peninsula, south of Cancun. It may not be your first choice if you look for beaches and relaxation. But if you want to see some fantastic architecture and walk in the footsteps of the Maya, you should definitely make plans to visit Tulum. The Mayans built the city between 1200 and 1450 CE. Common Era as a seaport for trading with other cultures in Mesoamerica. Its popularity rose with increased trade throughout Mexico during this period, however, it fell into disrepair after Spanish colonization began around 1519 CE, when conquistador Hernán Cortés took control over what had been largely autonomous states up until then. The buildings are made from limestone quarried from nearby cliffs and from sandstone blocks that were likely carried from much further away by barge or canoe along rivers and lakes, since there were no roads. The city of Uxmal is a magnificent example

of the Puuc style with its buildings built of fine stuccoed brickwork As you explore the site you can see how closely related it is to Chich n Itz and other major Maya sites in the region The Pyramid of the Magician also known as El Castillo is a fantastic pyramid building with 4 sides each having 91 steps and each step 7 feet tall for a total height of 65 feet House of Turtles or Casa del Adivino this building has beautiful decorations both inside and out depicting turtles in different positions some say that these turtles represent wisdom or knowledge Tikal is the largest Mayan ruin in Guatemala and is a UNESCO World Heritage Site The city was the capital of the Maya kingdom of the same name and one of their most potent cities dating back to at least 200 B C if not earlier It was abandoned by the Maya around 900 A D but its temples still tower over the jungle floor today some are even taller than they were when they were first built Palenque Crown of the North is one of the most critical sites in the Maya world Palenque was once a thriving city and capital of one of Mexico s most powerful states It boasts some of the most impressive ruins on this list It was first discovered by a German explorer in 1719 while looking for a site to build his own city The main pyramid at Palenque rises over 70 meters 230 ft into the air and its steps are steep enough to pause even hardened explorers when climbing them There are also two smaller temples nearby and many smaller statues depicting jaguars these symbolize power for humans and gods alike Sacred Mysteries Among the Mayas and the Quiches Augustus Le Plongeon,2007-04-01 Despite its proximity Central America is as distant to some North Americans as Asia and its people and traditions just as exotic Basing his study on archaeological evidence including buildings art and artifacts Augustus le Plongeon in 1866 provided a comprehensive account of ancient Mayan civilization the foundation for modern Central American culture Delivered with poetry and logic le Plongeon s comparison of the mythology and spiritual belief systems of this 11 000 year old society and those of others from the ancient Egyptians to Christians illustrates just how human many sacred mysteries are and just how closely bonded people and communities are no matter how far apart British archaeologist and photographer AUGUSTUS LE PLONGEON 1825 1908 attended school in Paris was shipwrecked off the coast of Chile and ran his own photography studio in San Francisco before settling in the Yucatan He wrote many scholarly manuscripts notes and letters and kept numerous photographs documenting his decades living in Central America
