Leibniz: Dissertation on Combinatorial Art Massimo Mugnai, Han van Ruler, 2020-05-28 Leibniz published the Dissertation on Combinatorial Art in 1666 This book contains the seeds of Leibniz's mature thought as well as many of the mathematical ideas that he would go on to further develop after the invention of the calculus It is in the Dissertation for instance that we find the project for the construction of a logical calculus clearly expressed for the first time The idea of encoding terms and propositions by means of numbers later developed by Kurt Gödel also appears in this work In this text furthermore Leibniz conceives the possibility of constituting a universal language or universal characteristic a project that he would pursue for the rest of his life Mugnai van Ruler and Wilson present the first full English translation of the Dissertation complete with a critical introduction and a comprehensive commentary

Moral Philosophy on the Threshold of Modernity Jill Kraye, Risto Saarinen, 2006-03-30 Over the past twenty years the transition from the late Middle Ages to the early modern era has received increasing attention from experts in the history of philosophy In part this new interest arises

from claims made in literature aimed at a less specialist readership that this transition was responsible for the subsequent philosophical and theological problems of the Enlightenment Philosophers like Alasdair MacIntyre and theologians like John Milbank display a certain nostalgia for the medieval synthesis of Thomas Aquinas and consequently evaluate the period from 1300 to 1700 in rather negative terms Other historians of philosophy writing for the general public such as Charles Taylor take a more positive view of the Reformation but nevertheless conclude that modernity has been shaped by 1 conflicts which stem from early modern times Ethics and moral thought occupy a central place in these theories It is assumed that we have lost something the concept of virtue for instance or the source of common morality Yet those who put forward such notions do not treat the history of ethics in detail From the historian s perspective their far reaching theoretical assumptions are based on a quite small body of textual evidence In reality there was a rich variety of approaches to moral thinking and ethical theories during the period from 1400 to 1600

Protestant Majorities and Minorities in Early Modern Europe Simon Burton,Piotr Wilczek,Michał Choptiany,Christopher B. Brown,Günter Frank,Bruce Gordon,Barbara Mahlmann-Bauer,Tarald Rasmussen,Violet Soen,Zsombor Tóth,Günther Wassilowsky,Siegrid Westphal,2019-08-12 The contributors to this volume examine the complex and dynamic role that Protestant majorities and minorities played in shaping the Reformations of the sixteenth and seventeenth centuries In doing so it offers an important perspective on the range of intellectual social economic political theological and ecclesiological factors that governed intra and inter confessional encounter in the early modern period While the principal focus is on the situation of different Protestant majority and minority groups many of the contributions also engage the relation of Protestants and Catholics with a number also considering early modern Christian dialogue with Muslims and Jews The volume is organised into five sections which together provide a comprehensive picture of Protestant majorities and minorities The first section explores intellectual trajectories especially those which promoted confessional unity or sought to break down confessional boundaries The second section taking the neglected Spanish Reformation as an important case study examines the clandestine aspect of minority activities and the efforts of majorities to control and suppress them The third section pursues a similar theme but examines it through the lens of Flemish and Walloon Reformed refugee communities in Germany and the Netherlands demonstrating the way in which confessional factors could lead to the integration or exclusion of minorities The fourth section examines marginal or peripheral Reformations whether geographically or doctrinally understood focussing on attempts to implement reform in the shadow of the Ottoman Empire Finally the fifth section looks at confessional identity and otherness as a principal theme of majority and minority relations providing both theoretical and practical frameworks for its evaluation
