normal came to be defined as learning disability and therefore emerged as parallel to the concept of intelligence An alternative approach to learning one founded on describing people s qualities rather than measuring quantities thought to represent their thinking and actions is narrated in chapter 3 Chapter 4 replaces the idea of intelligent with smart and describes eight ways of being smart which use the broad concept of multiple intelligences as guidelines Two tools are presented in chapter 5 which individuals can use to describe how they themselves are smart and how other people are smart The last chapter describes two programs Project Smart and Project ABLE which are a practical expression of the new alternative to learning Contains 93 references BAC Working Parents Can Raise Smart Kids John E.
