Cumulated Index Medicus, 1989 **The Present and Future Role of Monoclonal Antibodies in the Management of Cancer** Jerome M. Vaeth, John Meyer, 1990 Departments of Labor, Health and Human Services, Education, and related agencies appropriations for 1989 United States. Congress. House. Committee on Appropriations. Subcommittee on the Departments of Labor, Health and Human Services, Education, and Related Agencies, 1988 Pediatric Tumors John T. Kemshead, 2020-10-28 This monograph explains the considerable impact that monoclonal antibodies and molecular probes have had on the diagnosis of tumor types and sub types It explains how radiolabelled monoclonal antibodies have also been used as imaging agents to try to improve the oncologist s ability to define residual tumor deposits after combination chemo radiotherapy Finally the childhood malignancies that still have a poor prognosis are presented and new novel ways of therapy are explained **Clinic-oriented Multifunctional Biomaterials: From Rational Design to Applications** Meng Tian, Ye Cao, Yang Kang, Huixu Xie, Qianbin Wang, 2023-12-13 *ICRDB Cancergram*, 1986 Brain Oncology Biology, Diagnosis and Therapy M. Chatel, F. Darcel, J. Pecker, 1987 The International Meeting on Brain Oncology in Rennes was organised in honor of Jean Pecker to pay tribute to his contribution to the development of neurological sciences and to take stock of the current state of knowledge on brain tumors a domain in which the role of neurosurgery has been and will continue to be primordial During the two day conference the major themes of brain oncology studies both fundamental and clinical were examined oncogenesis tumoral markers and immunology metabolic and diagnosis imaging prognostic factors and therapeutic strategies The large number and high quality of participations resulted in a genuinely synthetic view of current advances in research of which this book presents the essentials We have attempted both to preserve the richness of scientific exchanges which occurred and to publish a great many oral and poster communications The book respects the organization of conference sessions and thus reflects the importance accorded to glial tumor studies This may seem disproportionate given their frequency of occurrence in proportion to total numbers of intracranial tumor processes but their gravity and quasi total resistance to current therapeutic methods are ample justification Moreover this is the domain in which hopes of progress are beginning to appear and it is becoming possible to envisage treatment based on recently established fundamental knowledge
