Clinical Finals And How To Pass Them:

Clinical Finals and how to Pass Them Kevin P. Hanretty, Tom Turner, Stuart Hood, John R. McGregor, Robert Hunter, 2004
This is a practical revision book for learning techniques to pass clinical examinations in all the major clinical subjects for final examinations. The book covers Medicine, Surgery, Obstetrics and Gynaecology, Paediatrics and Psychiatry. Each section starts with advice on the general aspects of examination of the patients followed by a series of clinical problems presented in the form of cases. Each case includes a fact file of key points to remember about this condition and advises on the likely discussion points that can be asked. The book outlines in each clinical problem the likely use of OSCE short and long case examinations.

Making Doctors Simon Sinclair, 2020-08-07
Few outsiders realize that student illness is frequently and ironically a by-product of medical training. This unique study by a medical doctor and trained anthropologist debunks popular myths of expertise and authority which surround the medical establishment and asks provoking questions about the acquisition and dissemination of knowledge within the field. In detailing all levels of basic training in a London medical school, the author describes students' official activities that is what they need to do to qualify as well as their unofficial ones such as their social life in the bar. This insider's exposé should prompt a serious reconsideration of abuses in a profession which has a critical influence over untold lives. In particular, it suggests that the structures and discourses of power need to be re-examined in order to provide satisfactory answers to sensitive questions relating to gender and race, the dialogue between doctor and patient and the mental stability of students under severe stress.
