HHAI 2023: Augmenting Human Intellect Paul Lukowicz, Sven Mayer, Janin Koch, John Shawe-Taylor, 2023-07-15 Artificial intelligence AI has been much in the news recently with some commentators expressing concern that AI might eventually replace humans But many developments in AI are designed to enhance and supplement the performance of humans rather than replace them and a novel field of study with new approaches and solutions to the development of AI has arisen to focus on this aspect of the technology This book presents the proceedings of HHAI2023 the 2nd International Conference on Hybrid Human Artificial Intelligence held from 26-30 June 2023 in Munich Germany The HHAI international conference series is focused on the study of artificially intelligent systems that cooperate synergistically proactively responsibly and purposefully with humans amplifying rather than replacing human intelligence and invites contributions from various fields including AI human computer interaction the cognitive and social sciences computer science philosophy among others A total of 78 submissions were received for the main conference track and most papers were reviewed by at least three reviewers The overall final acceptance rate was 43% with 14 contributions accepted as full papers 14 as working papers and 6 as extended abstracts The papers presented here cover topics including interactive hybrid agents hybrid intelligence for decision support hybrid intelligence for health and values such as fairness and trust in hybrid intelligence We further accepted 17 posters and 4 demos as well as 8 students to the first

HHAI doctoral consortium this year The authors of 4 working papers and 2 doctoral consortium submissions opted for not publishing their submissions to allow a later full submission resulting in a total of 57 papers included in this proceedings Addressing all aspects of AI systems that assist humans and emphasizing the need for adaptive collaborative responsible interactive and human centered artificial intelligence systems which can leverage human strengths and compensate for human weaknesses while considering social ethical and legal considerations the book will be of interest to all those working in the field Production at the Leading Edge of Technology Welf-Guntram Drossel,Steffen Ihlenfeldt,Martin Dix,2025-08-22

This book contains all contributions to the congress in which both detailed scientific investigations and technological innovations in the process chains of machining and forming are discussed as well as comprehensive far sighted overall views on the planning and control of production processes These approaches are supplemented by more interdisciplinary cross sectional topics such as robotics control engineering automation materials technology additive manufacturing and human centered production It is particularly striking that the main approaches presented aim to improve efficiency in production using data driven methods such as machine learning and artificial intelligence However the use of measurement results to improve simulations is also frequently addressed The book proceedings show that transformations can only succeed through the realization of both detailed technical improvements in production technologies and optimized production organization
