In fact, data's importance should earn it a spot at the center of our thinking and strategy around building a better, more ethical world. It's use and misuse lies at the heart of many of the racist, gendered, classist, and otherwise oppressive practices of modern tech. In the book, Dr. Brandeis Hill Marshall discusses how the philosophy of "move fast and break things" is itself broken and requires change. You'll learn about the ways that discrimination rears its ugly head in the digital data space and how to address them with several known algorithms, including social network analysis and linear regression. A can't miss resource for junior-level to senior-level software developers who have gotten their hands dirty with at least a handful of significant software development projects. *Data Conscience* also provides readers with discussions of the importance of transparency, explorations of computational thinking in practice, strategies for encouraging accountability in tech, ways to avoid double-edged data visualization schemes for governing data structures with law and algorithms. **Automation in Governance** Yee-Fui Ng, Matthew Groves, 2025-11-27 Examines the principles and practice of automation in public governance.

When Arna, an introverted college student, notices a quiet stranger at her bus stop, she doesn't realize how deeply he will linger in her thoughts. She sketches him. She dreams of him. And then fate brings them face to face at a school where words are not needed to be understood. *His Voice in His Hands* is a gentle, emotional journey through fleeting glances, handwritten diaries, quiet friendships, and hearts that speak without speaking.
