[The Executive Guide to Artificial Intelligence](#) Andrew Burgess, 2024-06-30 This

book now in a thoroughly revised and updated second edition takes a pragmatic and hype free approach to explaining artificial intelligence and how it can be utilised by businesses today At the book s core is a framework which describes in nontechnical language the nine core capabilities of Artificial Intelligence AI Each of these capabilities ranging from image recognition through prediction to Generative AI is explained using real life examples and how they can be applied in a business environment The advent of Large Language Models has put AI front and centre of Board discussions AI has the ability to deliver step change benefits to organisations and enables forward thinking business leaders to rethink their business models or create completely new businesses But most of the real value of AI is hidden behind marketing hyperbole confusing terminology inflated expectations and dire warnings of robot overlords Any business executive who wants to know how to exploit AI in their business today is left confused and frustrated As an advisor in AI Andrew Burgess regularly comes face to face with business executives who are struggling to cut through the AI and LLM hype The knowledge and experience he has gained in advising them has provided him with the skills to help business executives understand what AI is and how they can exploit its many benefits Through the distilled knowledge included in this book business leaders will be able to take full advantage of this most disruptive of technologies and create substantial competitive advantage for their companies

AI, Automation, and War Anthony King, 2025-08-19 Why AI will not replace human strategic judgement in war Is AI about to automate war Will autonomous drone swarms and killer robots controlled by AI dominate the battlespace and determine the winner In *AI Automation and War* Anthony King debunks this science fiction tinged narrative of AI s military potential exploring instead the actual applications of AI by the armed forces over the last decade He finds that AI is not going to replace human commanders and combatants the machines are not about to take over Rather the military has used and will continue to use AI to process data at a scale and speed that exceeds the capacity of humans AI will be used primarily to improve military understanding and intelligence King explains that military commanders enabled by the data processing power of AI will be able to see the battlespace at a previously unattainable depth fidelity and speed AI will help the armed forces plan target and conduct cyber operations faster and more effectively In order to harness AI in this way however a radical organisational transformation is taking place The armed forces are integrating civilian technologists into operational headquarters to work alongside military staff This partnership between the armed forces and the technology sector signals the emergence of a military tech complex that promises to be as powerful in this century as the military industrial complex was in the last
