[Code Collar 2030](#) Victor Singh, 2025-06-09

Foreword by Maxim Salnikov. Afterword by Eirik Norman Hansen.

While numerous books have been written on this topic, they have been so from an American lens; few, if any, capture the unique dynamics, values, and challenges faced by knowledge workers in the Nordic region. This book is a personal journey through how AI could reshape the world of knowledge workers by 2030, told from a distinctly Nordic perspective. The book covers various themes and is divided into four parts. Some are well thought out, while others are briefly meant as an overview for the reader to reflect on their own. Inspired by renowned thinkers such as Joseph Schumpeter, J.M. Keynes, and Peter Drucker, *Code Collar 2030* gives a broad overview into four key themes.

Part 1: Foundations of Artificial Intelligence

This part covers important technical and historical ground, giving you necessary context. Feel free to skip to Chapter 5 and come back to this section later if you prefer. That said, I highly recommend reading it first as it lays the groundwork for what follows.

Chapter 1: Gives a historical overview and provides the basis for how information evolved and is an important aspect towards AI today in terms of data. This chapter also explains the term knowledge worker, which is being used throughout this book in various roles.

Chapter 2: Explores the major milestones and players that have made the history of AI richer.

Chapters 3 & 4: Will give you the basic understanding of AI, including prompting and training, on how to identify AI-generated content, and core understanding to grasp the arguments throughout the book.

Part 2: Human Aspect

Chapter 5: Briefly discusses our shortcomings and why algorithms can be biased.

Chapter 6: Discusses the building blocks related to trust in personal and professional contexts.

Chapter 7: I discuss the aspect related to innovation and factors that might impact us as knowledge workers.

Chapter 8: Reflects on the purpose and meaning of work in the Age of AI as knowledge workers. This chapter examines the philosophical and personal aspects of work, probing the

evolving meaning of work in the age of AI Chapter 9 the unique circumstance of generation Z is addressed with regards to adopting and benefiting from AI technologies Chapter 10 discusses the economic impact of AI in terms of the impact on employment and job polarization caused by AI Chapter 11 Can we get a symbiotic Hybrid Workplace where knowledge workers and Artificial Intelligence Collaborate Part 3 How AI Affects certain knowledge workers Chapter 12 the position of algorithms in financial markets is discussed as I use the Norwegian oil fund and discuss the prospects of fund and wealth manager Chapter 13 The specific effects and implications of AI on project management are being discussed Chapter 14 focuses on how AI is transforming the legal profession as well as legal practices Chapter 15 considers how AI influences software coding and software engineers work Chapter 16 Discusses middle manager role and their importance using the Norwegian leadership aspects Chapter 17 Discussing briefly the impact of AI in relation to real estate profession Part 4 Reflections and Future Visions These two chapters contain speculative ideas presented specifically to create interesting dialogue and encourage further discussion Chapter 18 In this chapter a debate is presented about the likelihood of Universal Basic Income as a possible solution to the issue created by AI based on a vision that considers insights based on J M Keynes Chapter 19 is the final chapter which argues if Norway s political system suffers from inefficiencies planning fallacies and a disconnect between politicians and citizens could an AI driven democratic model be an idea This speculative vision re imagines traditional political structures through algorithmic decision making and participatory intelligence
