Transforming Digital Learning and Assessment Peggy L. Maki, Peter Shea, 2023-07-03

Responding to both the trend towards increasing online enrollments as the demand for face to face education declines and to the immediate surge in remote learning owing to the COVID 19 pandemic this book provides vital guidance to higher education institutions on how to develop faculty capacity to teach online and to leverage the affordances of an ever increasing array of new and emerging learning technologies This book provides higher education leaders with the context they need to position their institutions in the changing online environment and with guidance to build support in a period of transition It is intended for campus leaders and administrators who work with campus teams charged with identifying learning technologies to meet an agreed upon program or institution level educational needs for those coordinating across campus to build consensus on implementing online strategies and for instructional designers faculty developers and assessment directors who assist departments and faculty effectively integrate learning technologies into their courses and

programs It will also appeal to faculty who take an active interest in improving online teaching The contributors to this volume describe the potential of artificial intelligence algorithms such as those that fuel learning analytics software that mines LMS data to enable faculty to quickly and efficiently assess individual students progress in real time prompting either individual attention or the need to more generally clarify concepts for the class as whole They describe and provide access to a hybrid professional development MOOC and an associated WIKI that curate information about a wide range of learning software solutions currently available and present case studies that offer guidance on building the buy in and consensus needed to successfully integrate learning technologies into course program and institution level contexts In sum this book provides readers with a comprehensive understanding of the technological capabilities available to them and identifies collaborative processes related to engaging and building institutional support for the changes needed to provide the rapidly growing demand for effective and evidence based online learning AI in Social Studies Education Christopher H.

Clark, Cathryn van Kessel, 2025 The introduction of widely available generative AI tools has caused a frenzy of both positive and negative reactions Between utopian visions and apocalyptic predictions of AI's impact on education there is a need to thoughtfully consider what education in the age of AI can and should look like This volume focuses on the implications of AI technology for teachers in K 12 and university settings providing a careful look at its affordances and drawbacks for social studies curriculum and teaching Scholars specializing in the field of social studies education provide information and practical ideas for teaching with current technology alongside frameworks for thinking about future iterations of AI This book fills a critical need especially among educators to consider the current and potential future impacts of AI while avoiding the traps of alarmism or techno utopianism Whether skeptical or enthusiastic about AI every social studies educator will find something useful to their practice in this book Book Features First ever compilation of AI considerations and strategies in the context of social studies education Nontechnical explanations of what AI can do and not do in practical educational contexts to enable educators to approach its use with careful judgment Advice for educators to help them assess future iterations of AI technology Critical considerations of AI across multiple contexts e g ethics equity multilingual learners cybersecurity Work from leaders in technology and social studies education across Canada and the United States Contributors Erin C Adams Curby Alexander Elizabeth Barrow Daphanie Bibbs Ariel Cornett Matthew Cress Kevin Donley Leslie Smith Duss Lindsay Gibson Thomas C Hammond Marie Heath Dawnavyn James Patrick Kane Dan Krutka Liran Ma Tim Monreal Rachel Moylan Julie Oltman Zilong Pan Michelle Reidel Elizabeth C Reynolds Tina C Soliday Vi Trinh Bretton A Varga *Critical AI in K-12 Classrooms* Stephanie Smith Budhai, Marie K. Heath, 2025-09-08 A practical guide for teachers and students navigating the complicated intersection of artificial intelligence education and justice Artificial intelligence is rapidly integrating into today's classrooms but unlike other new technologies AI has the potential to harm making it difficult to take advantage of its benefits In *Critical AI in K 12 Classrooms* Stephanie Smith Budhai and Marie K Heath draw attention to the biases embedded within

AI algorithms such as those powering OpenAI's ChatGPT and DALL·E to guide students and teachers in developing strategies to best incorporate AI or not into equitable learning. AI's reliance on existing data and knowledge systems means Black, queer, those with disabilities and other marginalized students are at greater risk of being harmed by built-in limitations and bias. Budhai and Heath show how to circumvent if not actively resist such harms as machine learning NLPs, LLMs and GenAI enter the classroom with practical examples rooted in culturally sustaining abolitionist and fugitive pedagogies across disciplines. Their practical guide creatively answers the concerns of educators committed to forward thinking yet fair instruction and the needs of students eager to use AI for just ends. *Critical AI in K-12 Classrooms* meets the challenges of a key STEM technology with an eye toward cultivating a more just world. Balancing responsible learning with the joy of discovery, Budhai and Heath build a framework for AI instruction that all educators can confidently use.

Proceedings of the Future Technologies Conference (FTC) 2020, Volume 1 Kohei Arai, Supriya Kapoor, Rahul Bhatia, 2020-10-30. This book provides the state of the art intelligent methods and techniques for solving real world problems along with a vision of the future research. The fifth 2020 Future Technologies Conference was organized virtually and received a total of 590 submissions from academic pioneering researchers, scientists, industrial engineers and students from all over the world. The submitted papers covered a wide range of important topics including but not limited to computing, electronics, artificial intelligence, robotics, security and communications and their applications to the real world. After a double blind peer review process, 210 submissions including 6 poster papers have been selected to be included in these proceedings. One of the meaningful and valuable dimensions of this conference is the way it brings together a large group of technology geniuses in one venue to not only present breakthrough research in future technologies but also to promote discussions and debate of relevant issues, challenges, opportunities and research findings. The authors hope that readers find the book interesting, exciting and inspiring.

Technology Ethics Gregory J. Robson, Jonathan Y. Tsou, 2023-01-31. The first of its kind, this anthology in the burgeoning field of technology ethics offers students and other interested readers 32 chapters, each written in an accessible and lively manner specifically for this volume. The chapters are conveniently organized into five parts: Perspectives on Technology and its Value, Technology and the Good Life, Computer and Information Technology, Technology and Business, Biotechnologies and the Ethics of Enhancement. A hallmark of the volume is multidisciplinary contributions both 1) in analytic and continental philosophies and 2) across several hot button topics of interest to students including the ethics of autonomous vehicles, psychotherapeutic phone apps and bio-enhancement of cognition and in sports. The volume editors, both teachers of technology ethics, have compiled a set of original and timely chapters that will advance scholarly debate and stimulate fascinating and lively classroom discussion. Downloadable eResources available from www.routledge.com/9781032038704 provide a glossary of all relevant terms, sample classroom activities, discussion questions relevant for chapters and links to Stanford Encyclopedia of Philosophy entries and other relevant online materials.
