How To Ai Image Generator From Home:

Large Language Models Oswald Campesato, 2024-10-02 This book begins with an overview of the Generative AI landscape distinguishing it from conversational AI and shedding light on the roles of key players like DeepMind and OpenAI. It then reviews the intricacies of ChatGPT, GPT-4 and Gemini, examining their capabilities, strengths and competitors. Readers will also gain insights into the BERT family of LLMs including ALBERT, DistilBERT and XLNet and how these models have revolutionized natural language processing. Further, the book covers prompt engineering techniques essential for optimizing the outputs of AI models and addresses the challenges of working with LLMs, including the phenomenon of hallucinations and the nuances of fine-tuning these advanced models. Designed for software developers, AI researchers and technology enthusiasts with a foundational understanding of AI, this book offers both theoretical insights and practical code examples in Python. Companion files with code figures and datasets are available for downloading from the publisher. *How to Teach AI* Rachelle Dené Poth, 2024 Get practical tools and strategies for teaching AI across the K-12 curriculum with this accessible guide. As AI continues to transform our world, educators have a responsibility to stay current with the changes and ensure that students have the necessary knowledge and skills to succeed in the future. Written by an educator who is currently teaching on this topic, *How to Teach AI* shares practical strategies and tools based on what good practice looks like in the classroom right now. Readers will build confidence in integrating AI into their curriculum so they can effectively prepare students for their careers. Taking a friendly and accessible approach, the book covers a range of topics related to AI, such as machine learning, robotics and natural language processing, and includes examples of how these technologies are being implemented in different industries and their impact on education. The book includes a chapter dedicated to the ethics of AI, addressing issues around bias, intellectual property, student data privacy and more. The book includes ideas for using generative AI in the classroom and tips for writing effective prompts. Activity ideas across content areas including computer science, economics, literature, music and more. Time-saving ideas for teachers and study aids for students to explore AI-powered tool recommendations for teachers. Questions for reflection in every chapter. With examples from educators in the field and a variety of resources to apply in the classroom, this book helps educators become comfortable with this important topic and create meaningful learning experiences for their students. Audience: Elementary and secondary educators and technology coaches. **Values Information from AI** The Values We Share Project, Values information from AI is a collection of information and images of values generated from an AI tool as part of The Values We Share Project to promote values. All information in this book can be used to promote values and can be used as material in values formation programs.
