Generative AI and Education B. Mairéad Pratschke, 2024-08-27 This volume addresses the gap in knowledge around generative AI and its applications in education It draws on the recent history of technological innovation and digital pedagogies locating generative AI in the contemporary discourse around education futures It argues that a new hybrid model of education is emerging requiring educational institutions to embed generative AI into course and programme design delivery and assessment It also proposes a shift from a focus on learning as output to learning as a process and explores what that shift might look like Grounded in educational theory it offers actionable

pedagogy informed guidance on how to position AI as a collaborator in the construction of learning in a manner that is congruent with the values and aims of education. It offers advice based on evidence based digital pedagogy including frameworks for effective teaching and learning with generative AI that enable educators and designers to put these ideas into practice. The book also explores the wider context informing this shift connecting narratives from governments and industry leaders on the strategic importance of generative AI and lifelong learning, learning agility and future skills that make the case for the integration of competency based assessment into mainstream education. Finally going beyond pedagogy and practice it considers some of the broader issues including limitations and ethics and the implications of integrating generative AI into institutional planning and design and includes a sample roadmap for education leaders to start the process of integrating generative AI into their institutions. This work approaches the topic of generative AI from the vantage point of educators by addressing themes and concerns that will resonate with professionals in the sector. *The Digital Practice* Campion Quinn, 2025-11-30. This book shows healthcare leaders how to translate digital touchpoints into measurable growth for their medical practice without tripping HIPAA tripwires or burning precious budget. Physicians, clinics and hospital systems can no longer rely on word of mouth or billboard ads. More than half of U.S. adults now research a doctor online before booking and 54 percent of primary care visits already touch telehealth. This book is a practical, data-rich road map that guides readers from How do I get found to How do I prove ROI to the CFO. Twenty-two tightly sequenced chapters begin with foundational concepts: digital consumer behavior and the legal basics of online promotion and progress to advanced tactics such as AI-driven predictive analytics and virtual reality patient education. The narrative arc moves the reader along the exact path a practice must follow to launch, optimize and future-proof its digital presence. Early chapters explain why physicians must meet patients where they already search online while later chapters quantify how smart data analysis supercharges campaign ROI. Every tactic is paired with the relevant U.S. privacy rule or advertising statute. Boxes supply SMART goal worksheets, consent form boilerplates, influencer vetting checklists and a downloadable ROI calculator. Detailed walkthroughs of Google Analytics, Sprout Social, Tableau and comparable platforms help busy teams pick the right dashboard fast. Each section closes with real results and a dedicated Emerging Technologies chapter demystifies AI chatbots, augmented reality and 5G-enabled telehealth, showing readers where to invest next. The book closes with scenario analyses and a checklist for staying agile in an algorithm-driven future. This is an ideal guide for all physicians running a medical practice. *Big Data - BigData 2025* Shunli Zhang, Yu Zhang, Santoso Wibowo, Liang-Jie Zhang, 2025-11-01. This book constitutes the refereed proceedings of the 14th International Conference on Big Data, BigData 2025, held as part of the Services Conference Federation SCF 2025 in Hong Kong, China, during September 27-30, 2025. The 15 full papers included in this book were carefully reviewed and selected from 25 submissions. The conference aimed to provide an international forum to formally explore various business insights into all kinds of value-added agent for big data. Big Data is a key enabler in exploring

business insights and economics of services **Global Medical Education in Normal and Challenging Times** Shabih H. Zaidi, Shahid Hassan, Shoaleh Bigdeli, Tabassum Zehra, 2024-05-29 This book is written by several medical educators from developed as well as developing countries based on decades of experience in teaching The unique experience gained during the COVID 19 pandemic has added new dimensions to the traditional pedagogy andragogy and heutagogy documented here The salient topics include distance learning virtual classrooms virtual workshops on OSCEs open book exams micro learning micro credentialing blended or digitalized curriculum delivery academic leadership communication skills professionalism telemedicine bioethics cyber clinics artificial intelligence etc This book is used as a text or reference book by physicians teachers scholars students and medical universities for teachers training capacity building and guidance on fundamental pillars of cognitive domains of knowledge skills and attitude as well as factual conceptual procedural and metacognitive skills It is also a source of guidance in faculty enhancement and toward continued quality improvement in medical education
