Prinz, 2022-12-01 Significant advances in the field of artificial intelligence have given a strong tailwind to the spread of technologies based on it AI technologies are increasingly influencing private contexts but also the service sector where more

and more service encounters are handled by chatbots. In part, however, the spread of chatbots and the associated focus on their functional advantages seem to contradict extant research findings that service interactions are also driven by emotional components. A central role is played here by so-called emotional contagion, i.e., the unconscious transfer of emotions from employees to customers. Against the background that this contagion with positive emotions can lead to a better evaluation of the service transaction in the further course, it is the goal of this book to investigate the effects of positive displayed emotions of a chatbot. For this purpose, six consecutive studies were conducted. The results show that the expression of positive emotions by a chatbot enriches the service interactions by transmitting positive emotions that in the further course do also lead to a better evaluation of the service experienced. Moreover, it is shown that these emotional reactions are dependent on the customer's personality and the chatbot's appearance expressed through an avatar.

Wetland Habitats of North

America Darold P. Batzer, Andrew H. Baldwin, 2012-05-22 *Wetland Habitats of North America* is essential reading for everyone who studies, manages, or visits North American wetlands. It fills an important void in the wetland literature, providing accessible and succinct descriptions of all of the continent's major wetland types. Arnold van der Valk, Iowa State University. Batzer and Baldwin have compiled the most comprehensive compendium of North American wetland habitats and their ecology that is presently available, a must for wetland scientists and managers. Irving A. Mendelsohn, Louisiana State University. If you want to gain a broad understanding of the ecology of North America's diverse wetlands, *Wetland Habitats of North America* is the book for you. Darold Batzer and Andrew Baldwin have assembled an impressive group of regional wetland scientists who have produced a virtual encyclopedia to the continent's wetlands. Reading the book is like a road trip across the Americas with guided tours of major wetland types by local experts. Your first stop will be to coastal wetlands with eight chapters covering tidal wetlands along the Atlantic Gulf and Pacific coasts. Then you'll travel inland where you can visit any or all of 18 types ranging from bottomland swamps of the Southeast to pothole marshes of the Northern Prairies to montane wetlands of the Rockies to tropical swamps of Central America and desert springs wetlands. All in one book! I'm impressed. Every wetlander should add this book to her or his swampland library. Ralph Tiner, University of Massachusetts Amherst.
