with a focus on the new European AI Act 2025 regulations Practical examples and integration advice for your daily workflow to start creating engaging and superior quality videos immediately This guide is designed to save you time and money by avoiding lengthy research or trial and error testing and to give you a competitive edge in the modern era of automated video production Perfect for marketers videomakers trainers businesses and content creators eager to take their content to a professional level with the most updated and high performing AI technology MASTERING 4K AI Videos is the key to turning your creative vision into reality with the confidence of knowing the best tool for your project and budget Don't let the competition surpass you Get the guide today that will change the way you make videos *International Handbook of AI Law* Matthias Artzt, Oliver Belitz, Simon Hembt, Nils Löfing, 2024-12-03 In recent years the field of Artificial Intelligence AI has seen remarkable advances revolutionizing how we live work and interact with technology As AI systems grow increasingly sophisticated and autonomous they raise new and challenging legal questions particularly regarding AI specific risks associated with automated systems This indispensable handbook written in clear language by international experts from all over the world sheds light on the complex relationship between AI and the law covering both existing laws and emerging AI specific legal regulations Beginning with a comprehensive and insightful technical analysis of how AI works subsequent chapters cover a wide array of legal fields relevant to AI technology focusing on the legal framework in the EU including the following topics the EU AI Act AI Specific Liability and Product Safety Data Protection Data Law Intellectual Property Contracting Antitrust Criminal Law Cybersecurity Employment Law and Legal Tech The book concludes with country reports on the legal and regulatory environment in the United Kingdom the United States China and Japan contrasting them with the EU legal framework Each chapter offers practical advice for implementing legal principles making the handbook a valuable resource for real world applications It is an essential guide for practitioners policymakers academics and others seeking a deep understanding of the complex legal challenges posed by AI use The handbook aids in responsible and trustworthy AI development and use by guiding decision making reducing risks and protecting the rights and well being of individuals and society Artificial Intelligence and Universal Values Jay Friedenberg, 2024-07-14 The field of value alignment or more broadly machine ethics is becoming increasingly important as artificial intelligence developments accelerate By alignment we mean giving a generally intelligent software system the capability to act in ways that are beneficial or at least minimally harmful to humans There are a large number of techniques that are being experimented with but this work often fails to specify what values exactly we should be aligning When making a decision an agent is supposed to maximize the expected utility of its value function Classically this has been referred to as happiness but this is just one of many things that people value In order to resolve this issue we need to determine a set of human values that represent humanity's interests Although this problem might seem intractable research shows that people of various cultures and religions actually share more in common than they realize In this book we review world religions moral philosophy and evolutionary psychology to elucidate a

common set of shared values We then show how these values can be used to address the alignment problem and conclude with problems and goals for future research The key audience for this book will be researchers in the field of ethics and artificial intelligence who are interested in or working on this problem These people will come from various professions and include philosophers computer programmers and psychologists as the problem itself is multi disciplinary
