Innovations and Applications of Technology in Language Education Hung Phu Bui, Raghvendra Kumar, Nilayam Kumar Kamila, 2024-07-12 The linguistics and language education world has recently experienced a rapidly proliferating interest in applying technology. This interdisciplinary area bridges the gap between two previously separate fields. *Innovations and Applications of Technology in Language Education* is a collection of 12 chapters by an international group of language and linguistics education experts. Although technology in language education is a global interest, its practices should be contextualized. This book covers how language educational technology is currently applied, discusses how it should be applied, and gives directions for its future development. It then examines the use of technology to enhance students' English language skills. Acknowledging the advantages and disadvantages of AI-mediated communication, this book argues for the use of AI to facilitate communication in language education.
