The fusion of technologies blurring distinctions between the physical, digital, and biological worlds has become a significant hallmark of the fourth industrial revolution. One answer to shaping the future in the age of the digital revolution is the concept of Society 5.0. A super-smart society aims to create an efficient reality regardless of region, age, gender, language, or other factors. The contributors ask about the place for human beings, exclusion or inclusion, and the communication of natural languages in a reality dominated by big data, artificial intelligence, and robotics. They intend to look at selected problems like humanities vs. technology, new perspectives in education and communication, digital and technological revolution. Thus, contributors' considerations capture philosophical reflection, sociological analysis, discourse, and corpus analysis, translatology, business, academic, as well as educational insights into the future of traditional studies. **101 Ways to Make Money with AI: 2025 Edition**
