They are helping people like you and hundreds of millions of others every day when something gets broken or when something doesn't work. However, their jobs are in danger and yours could be too. They could be largely replaced by computer automation. With the rapid growth of Artificial Intelligence capabilities, connected products, and virtual reality, we will see a change in the customer service industry in the upcoming decade that we haven't seen before. Moreover, in just about 30 years, computers may reach and quickly surpass the general human intelligence. And then what? This book is for everyone who is curious about these developments and how it will affect everyone's job. **Customer Service in the Transhuman Age**.
