*Controlled-Release Delivery Systems for Pesticides* Herbert B. Scher, 1999-06-10 Highlighting means of reducing toxicity increasing efficacy lessening environmental impact and facilitating product development this work covers up to date advances in pesticide delivery technologies It evaluates pesticide formulations and their use in mixtures that reduce physical incompatibilities in spray tanks and biological antagonism in the field      **Controlled Release of Pesticides and**

**Pharmaceuticals** D. H. Lewis, 2013-06-29      *Controlled Release Pesticides Formulations* Nathan F. Cardarelli, 2018-01-17

The main goal of this book is to present a summary of the state of the art historical background Conventional chemical pest control methods are mentioned only as a means of comparison to controlled release Research endeavour with biological weapons potential usage of such controls and the few instances of success are likewise brought into focus with the same motive Formulations and methods of preparing controlled release pesticides are discussed in some detail as concerns the antifouling and molluscicide areas where the compounding methodology has been well developed The mathematical basis of controlled release has been developed to an extent and is presented in an abbreviated form      **Controlled Release of**

**Pesticides for Sustainable Agriculture** Rakhimol K. R., Sabu Thomas, Tatiana Volova, Jayachandran K., 2019-08-01 This

book presents an introduction to the concept and need of sustainable agriculture the mechanisms of conventional and controlled release of pesticides herbicides and plant hormones It also contains the carriers which supply controlled release including polymers and nanoparticles A full chapter is devoted to the theory and simulation aspects      **Controlled Release**

**Technologies** Agis F. Kydonieus, 2019-07-17 First Published in 1985 this book offers comprehensive insight into the process of administering chemical ingredients Carefully compiled and filled with a vast repertoire of notes diagrams and references this book serves as a useful reference for students of pharmacology and other practitioners in their respective fields

**Controlled Release of Bioactive Materials** Richard Baker, 2012-12-02 Controlled Release of Bioactive Materials is a collection of papers that deal with the study of controlled release applications in drugs and other pharmacological products and processes. The text covers topics such as the theory and practice of controlled drug delivery from bioerodible polymers, biodegradable drug delivery systems from aliphatic polyesters and the applications of osmotic drug delivery. Also covered are topics such as the application of polymers for the sustained release of macromolecules, controlled transdermal delivery and the use of hydrogel devices for the controlled release of steroid hormones. The book is recommended for pharmacologists and doctors who would like to know more about advancements in the field of controlled release applications and its uses in healthcare, especially in pharmacology.

**Controlled Release, Biochemical Effects of Pesticides, Inhibition of Plant Pathogenic Fungi**, 2012-12-06 Since the middle of the Sixties, new types of formulation for biologically active compounds have been developed which have been introduced into the literature under the term Controlled Release Formulations (CRF). Stimulated by results from former and successful pharmaceutical research which was engaged in the production of preparations with protracted effects, introduction onto the market in the year 1952 of D-amphetamine in the form of pellets coated to varying degrees with fats and waxes, 1. experiments were carried out to transfer the prolongation of effectiveness to pesticidal substances also by means of a depot formulation. Initial work was concerned with the production of protective coatings for sonar systems in marine ecosystems. By means of antifouling paints or rubber coatings containing tri-n-butyl tin oxide (TBTO), the growth of marine organisms on sonar domes, buoys and hulls in the water could be effectively prevented. 2. 3. Controlled release formulations of pesticides are defined as depot systems which continuously release their toxic constituents into the environment over a specified period of time, usually months to years. 4. According to this definition, such formulations can be successfully employed where a chronic exposure to biologically active compounds is required over a longer period. The following hypothetical example is intended to illustrate this. 5. In Fig. 1, the duration of activity of a non-persistent pesticide with a loss rate under environmental conditions of  $t_{1/2}$  15 days is graphically illustrated. **Controlled Release Pesticides**
