Controlling Weeds Without Chemicals:

Controlling Weeds Without Chemicals Anne Duncan Edwards, 1981 *Sustainable Agriculture* John Mason, 2003-09-03

The technological revolution in farming practices has allowed us to clear and cultivate more land grow plants and animals faster and kill a greater variety of pests and diseases than ever before Unfortunately these efficiencies are proving to be unsustainable in the long term and have created problems such as soil structural decline erosion salinity soil acidification loss of fertility nutrient loading of waterways dams and a build up of chemical residues This book is about foreseeing and understanding such problems and addressing them before it is too late John Mason examines all these problems and explains the concepts and long term benefits of sustainable farming systems such as permaculture biodynamics organic farming agroforestry conservation tillage and integrated hydroculture *Sustainable Agriculture* 2nd Edition also looks at important issues such as monoculture versus polyculture the use of hybrids selection criteria for plants and stock integrated pest management and preparing a farm for droughts and floods Other areas examined include diversifying into farm tourism and value adding before selling produce **The Identification and Control of Colorado Weeds** Wilfred William Robbins, Breeze Boyack, 1919 Gardening, Naturally Sara Williams, Hugh Skinner, 2011-03-01 An expert look at alternatives to the chemical stew to keep your lawn and garden healthy and the entire planet happy and safe More than two generations of gardeners have practiced their craft with the arsenal of chemical pesticides and herbicides developed since WWII The folk knowledge used for generations prior to that much of which does indeed have a scientific basis is largely unused and even forgotten today Much of the more recent scientifically based research into alternatives has had limited distribution As the green movement grows stronger in Canada and pressure increases to limit the use of cosmetic pesticides and herbicides within urban and even rural municipalities there is a growing need for information about effective alternate tools The desire to go chemical free is there Here are the tools to make it possible with comprehensive understandable workable practices
