## **Conversations About Cancer:**

**Conversations with Breast Cancer Patients** Ernest Greenberg, MD, 2002-12-31 From diagnosis through the progression of their disease breast cancer patients confide to their oncologist their fears their hopes the personal problems created by their illness and their ways of coping or their inability to cope with the disease and its treatment Drawing on forty years of treating women and men diagnosed with breast cancer author and oncologist Ernest Greenberg shares stories recounting the close collaboration in the therapeutic decision process he has had with patients over the course of his practice As these patients discussed their options they managed to laugh but also did not hide their tears These conversations reveal how physician and patients worked together in the effort to make life with or after breast cancer livable and whenever possible enjoyable The result is an honest and open examination not of treatment options as those change constantly frequently at the interval of only a few months but of how to live with the illness and the treatment that it requires Presenting a conversational account of living with breast cancer and its aftermath this collection of personal narratives offers a message of hope and positive thinking The Art of Conversation in Cancer Care Richard P. McQuellon, Michael A.

Cowan, 2021-09-23 Every day thousands of people are diagnosed with cancer or other life threatening illnesses Despite the best of intentions it is not always easy to communicate well under these circumstances or find deep empathy for something one has never experienced When is it best to speak and when to be silent How can someone provide real comfort and how can relationships with loved ones facing serious illness be enhanced in this most difficult time Written by a psychosocial oncologist and psychologist theologian The Art of Conversation in Cancer Care Lessons for Caregivers offers practical suggestions for health professionals families and friends about talking to one who has cancer This revised and updated second edition is organized around the themes of mortal time and healing conversation with cancer patients and their caregivers Mortal time is not so much a specific period but rather the psychological experience encountering mortality that often accompanies the diagnosis of cancer The first section of the book articulates the many ways people experience mortal time including a range of adaptive and less adaptive methods Next the basic elements of healing conversation are delineated with an emphasis on the hope that can spring from talking with a trusted companion Empathy listening carefully and responding thoughtfully and compassionately are discussed In the final section the authors offer guidance for caregivers This section includes material on the risks and costs of companionship as well as personal virtues that help a person navigate the demands of mortal time with their loved one The authors discuss resilience and the consequences of absorbing suffering including empathy shift where the cancer caregiver becomes less empathic with minor illnesses in others They conclude with the power of healing conversation in mortal time as a source of hope Throughout numerous patient vignettes illustrate the art of conversation in cancer medicine *Conversations about Cancer* American Cancer Society.
