about pest control measures as well as disease control measures This is essential to successful vegetable production and

harvesting Both insects as well as diseases are getting to be more of a serious problem with the passing of the days because

they are getting to be immune to pesticides This happens to be a vicious circle You spray powerful pesticides on them to kill

just one generation of insects and pests Within a couple of months you have a more powerful generation mutating this

particular insect generation is going to be pesticide resistant To counteract this particular problem we are going to use even

more powerful pesticides not knowing the harm those poisons and chemical toxins can do to our own system But then we are

working on a short term solution There is another reason why more and more different strains of insects are cropping up so

easily on our land That is because we have changed our agricultural practices These may now favor the growth of the insect

population on the land This book is going to give you plenty of information on how you can control pests as well as diseases

in your garden There will be plenty of tips and precautions as well as methods of how you can control the common insects

and diseases found in your garden or in your vegetable patch right now World Crop Protection: Pests and diseases, by J.
